## Antonie van Leeuwenhoek

- Businessman
- Amateur biologist
- Lenses made ...
- from pulling glass rods apart in a flame?
- Sanding?

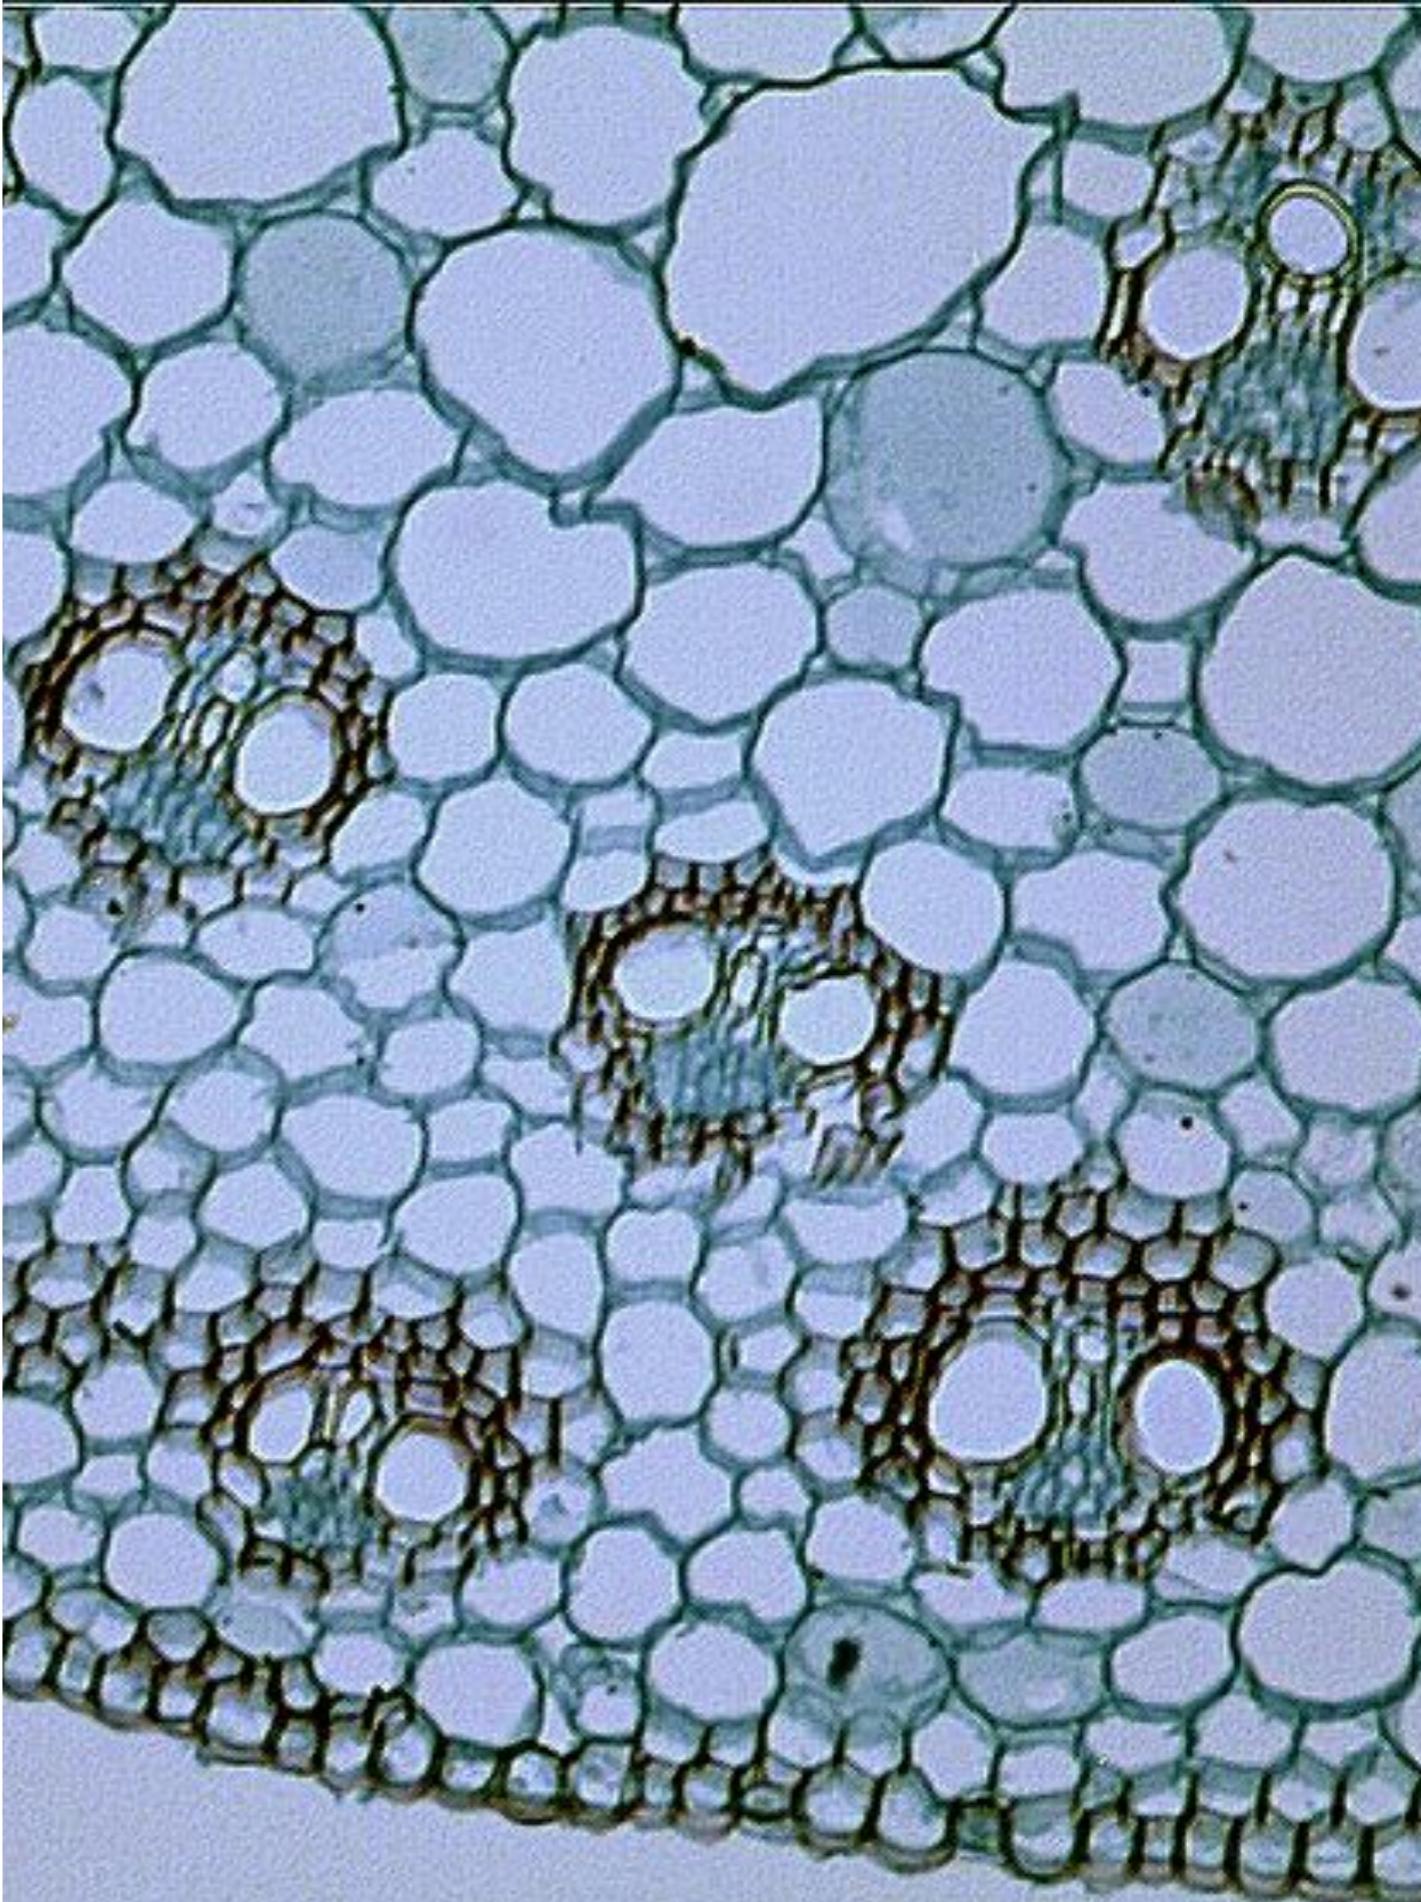

Replica of microscope by Leeuwenhoek  
Jeroen Rouwema - CC BY-SA 3.0

## Bright Field

- Shadow of the object

Zea Stem Cross section Magnified 100 times  
John Alan Elson - CC SA BY 4.0

## Dark Field

- Light from the side
- Reflected light
- Better contrast

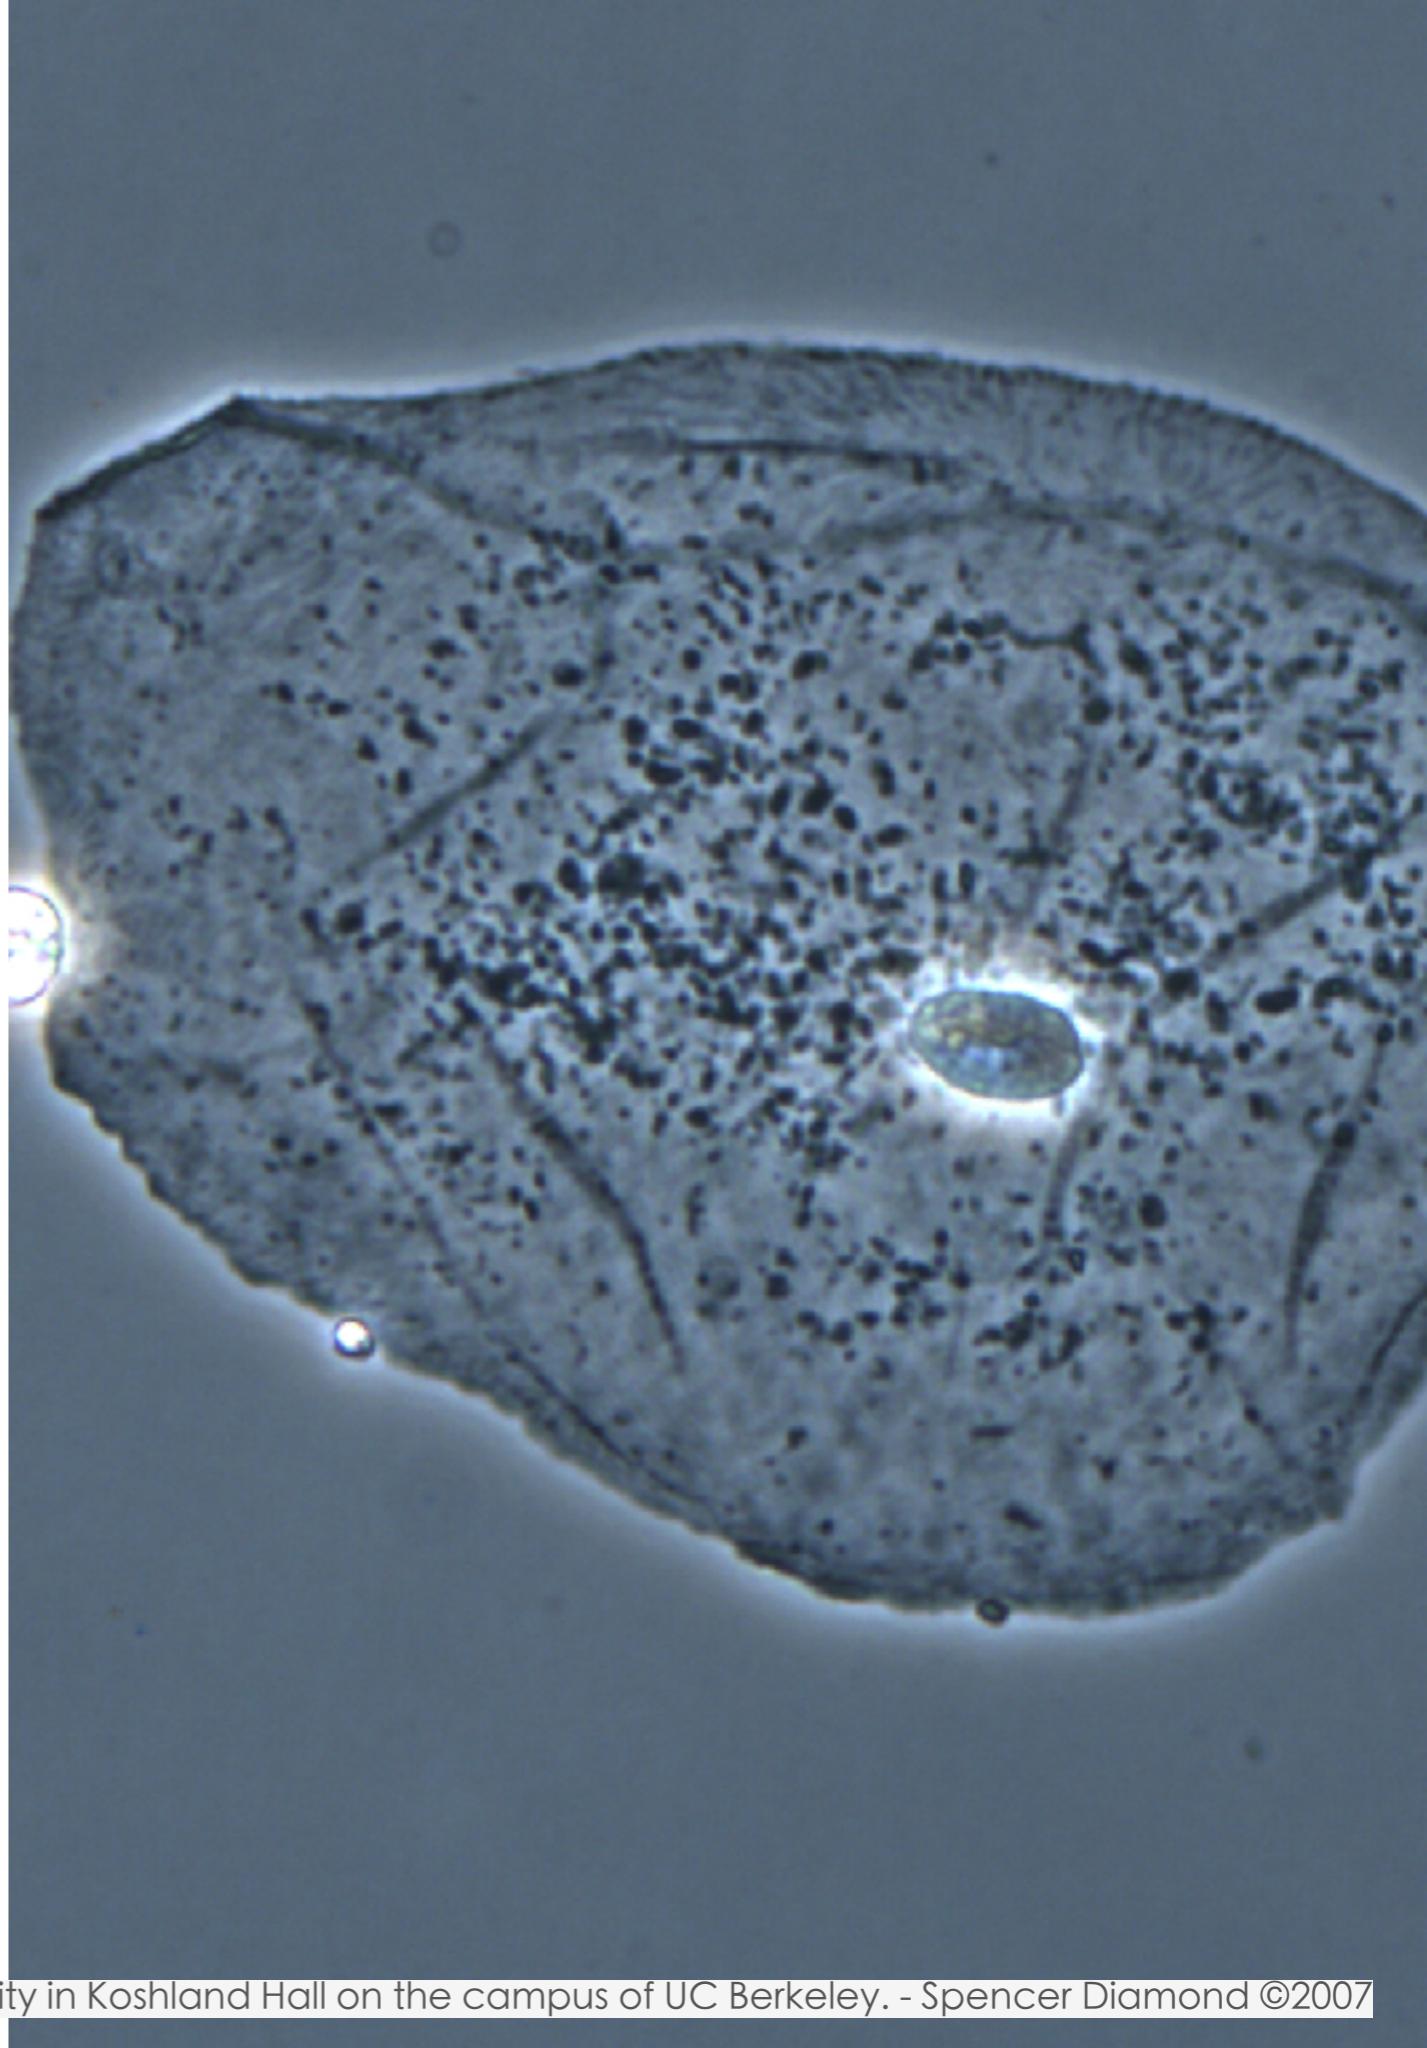

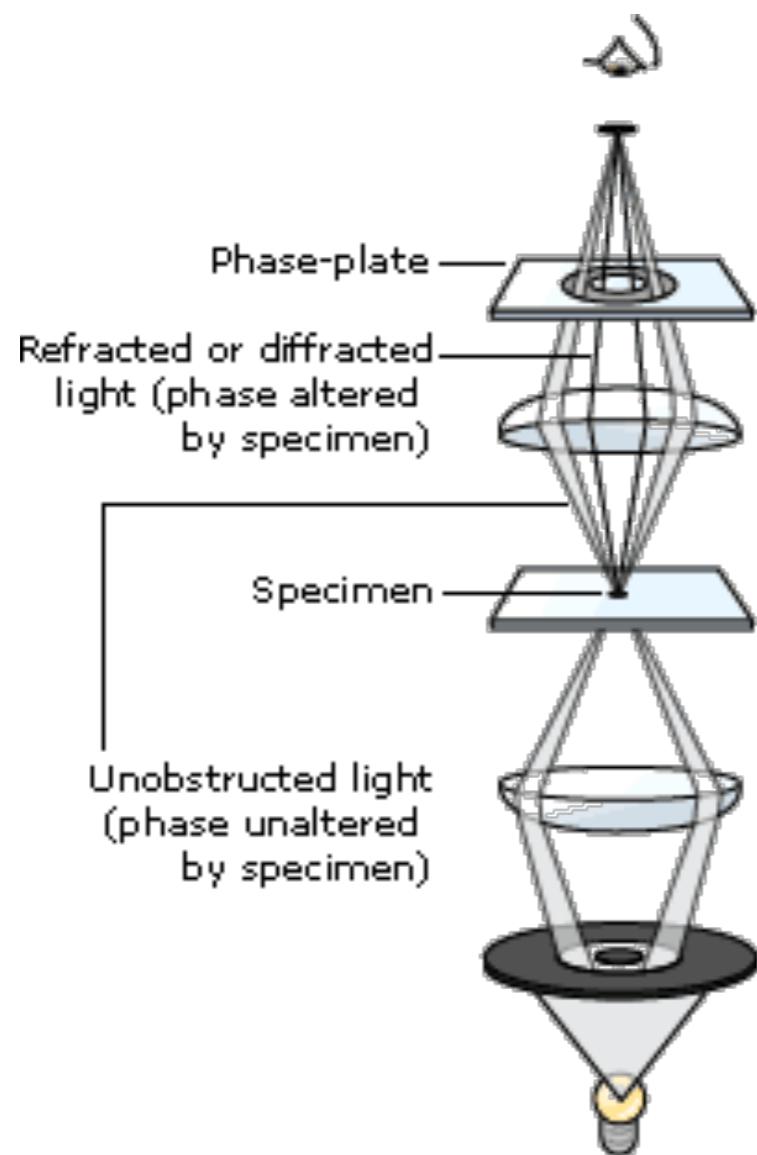

mysis zooplankton  
Uwe Kils - CC BY SA 3.0

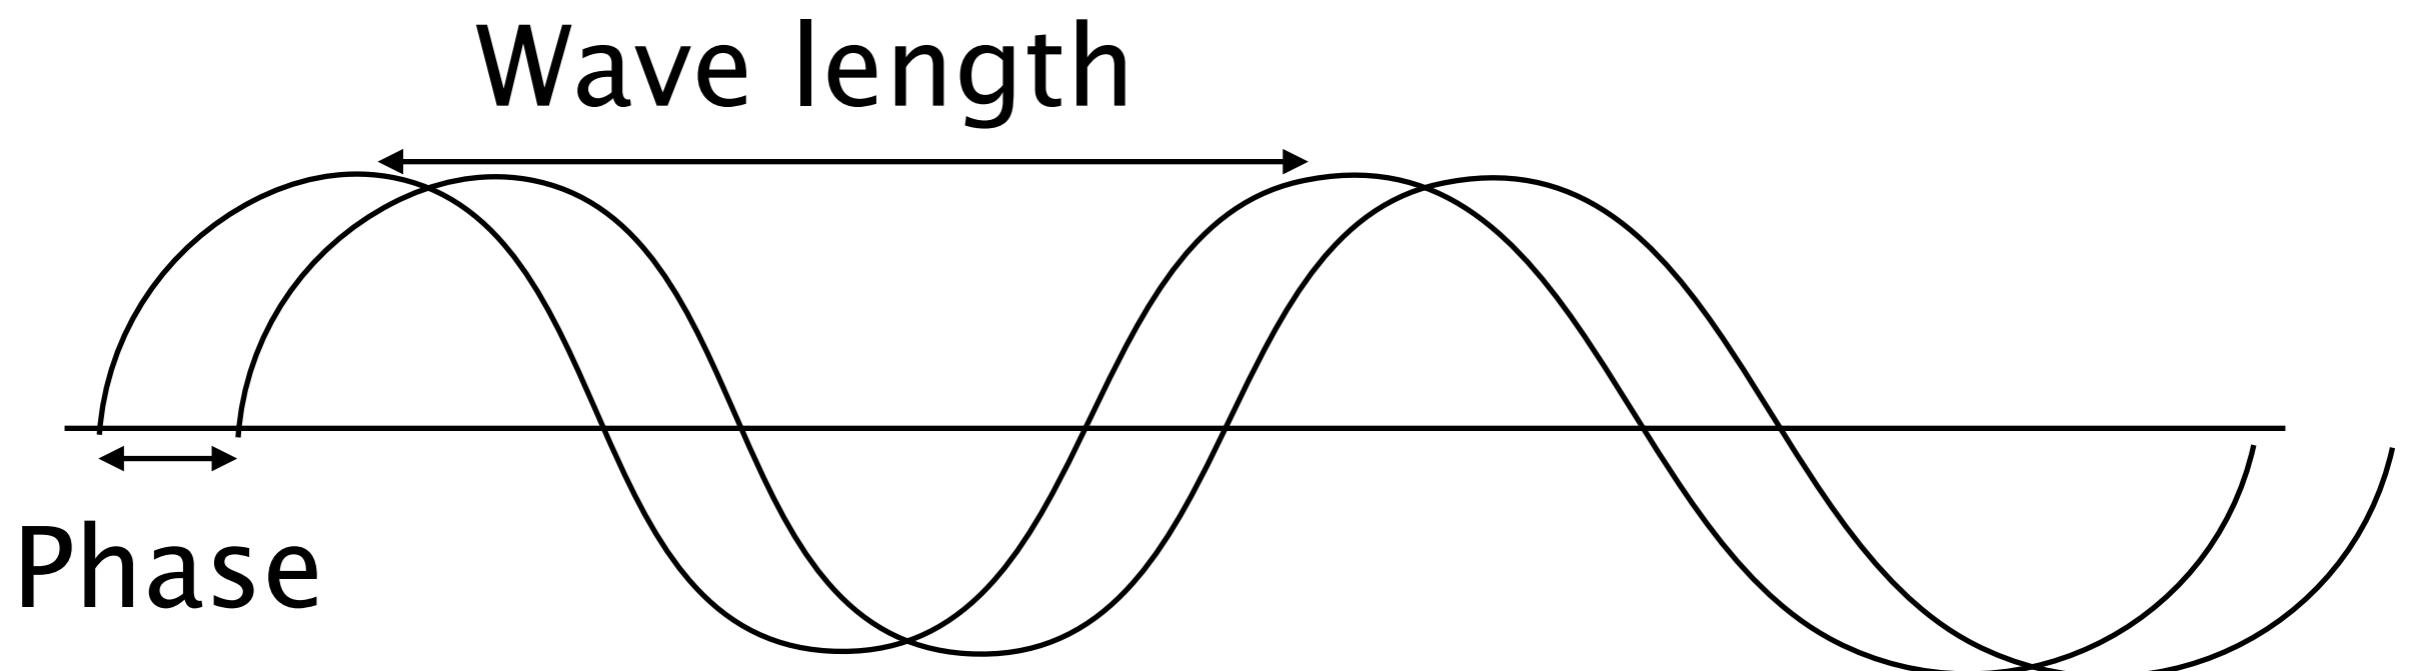

# Phase Contrast

No need for staining

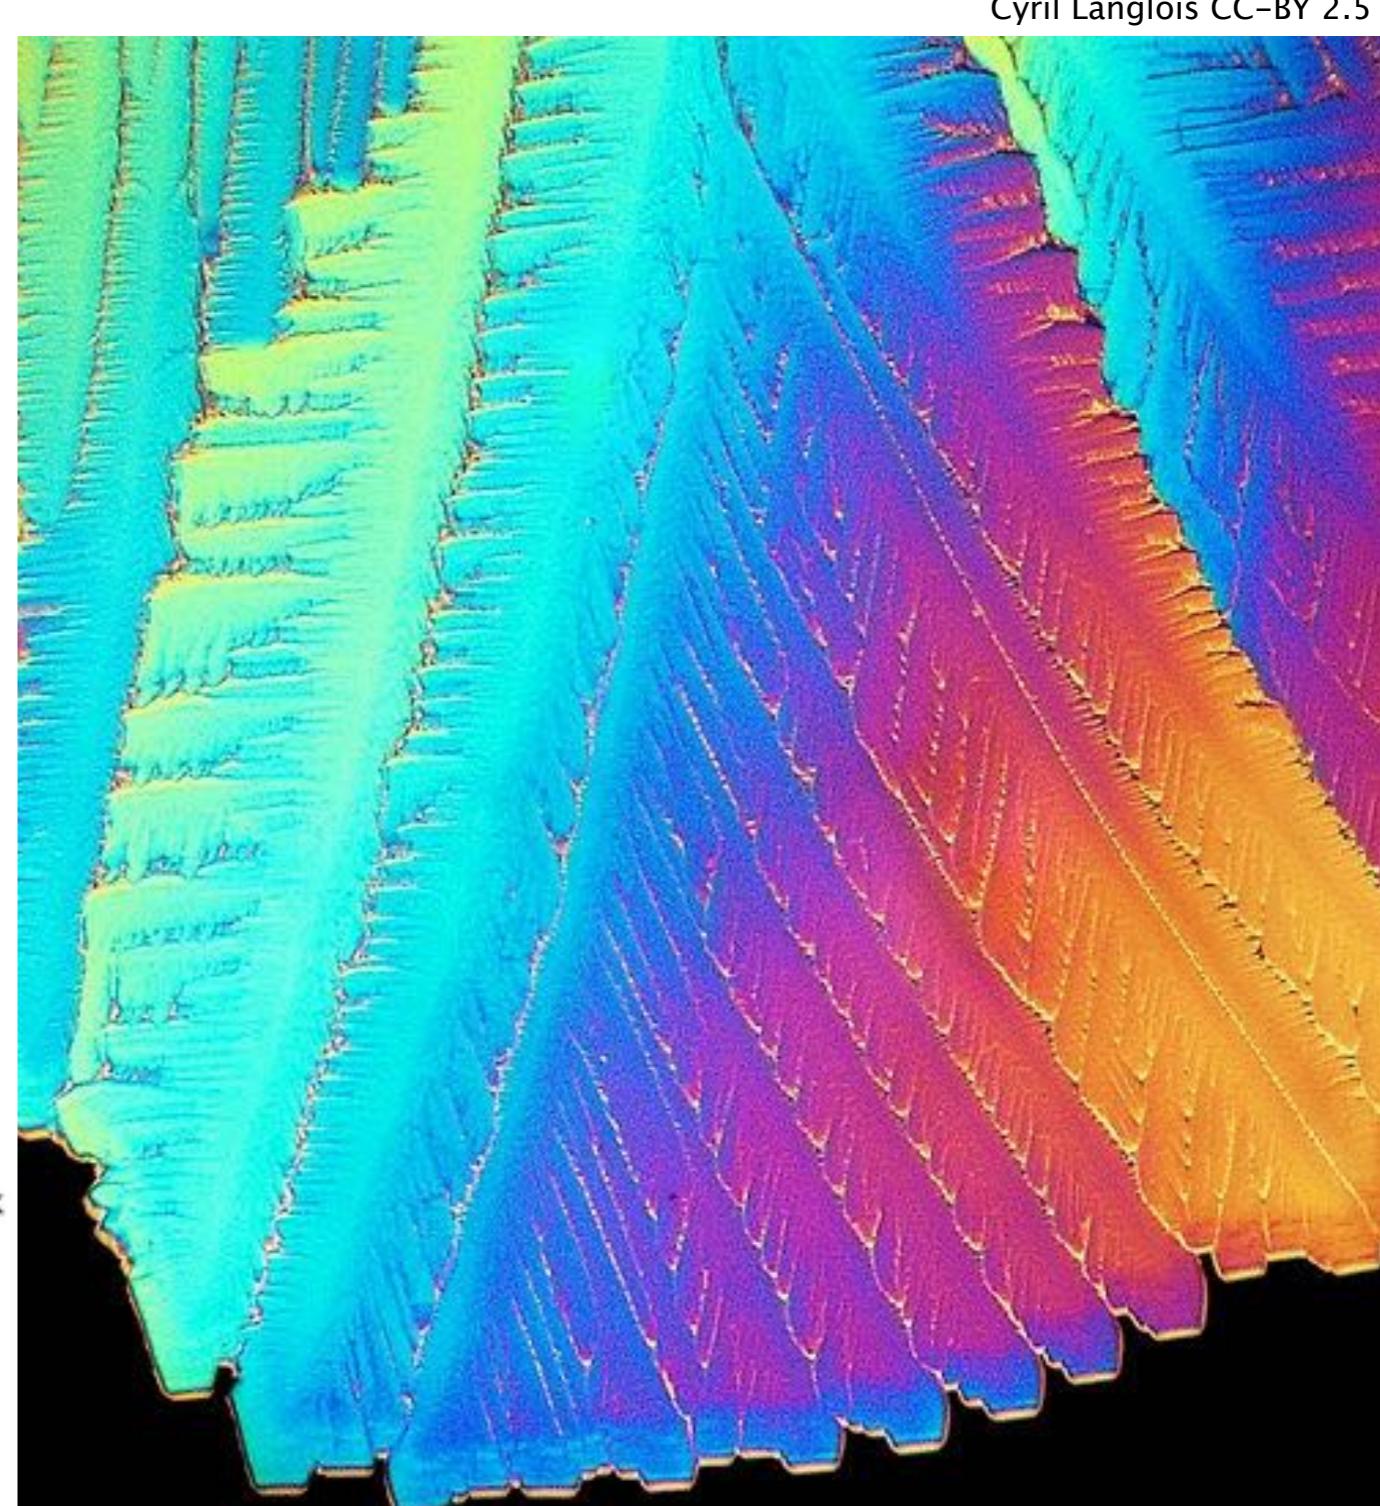

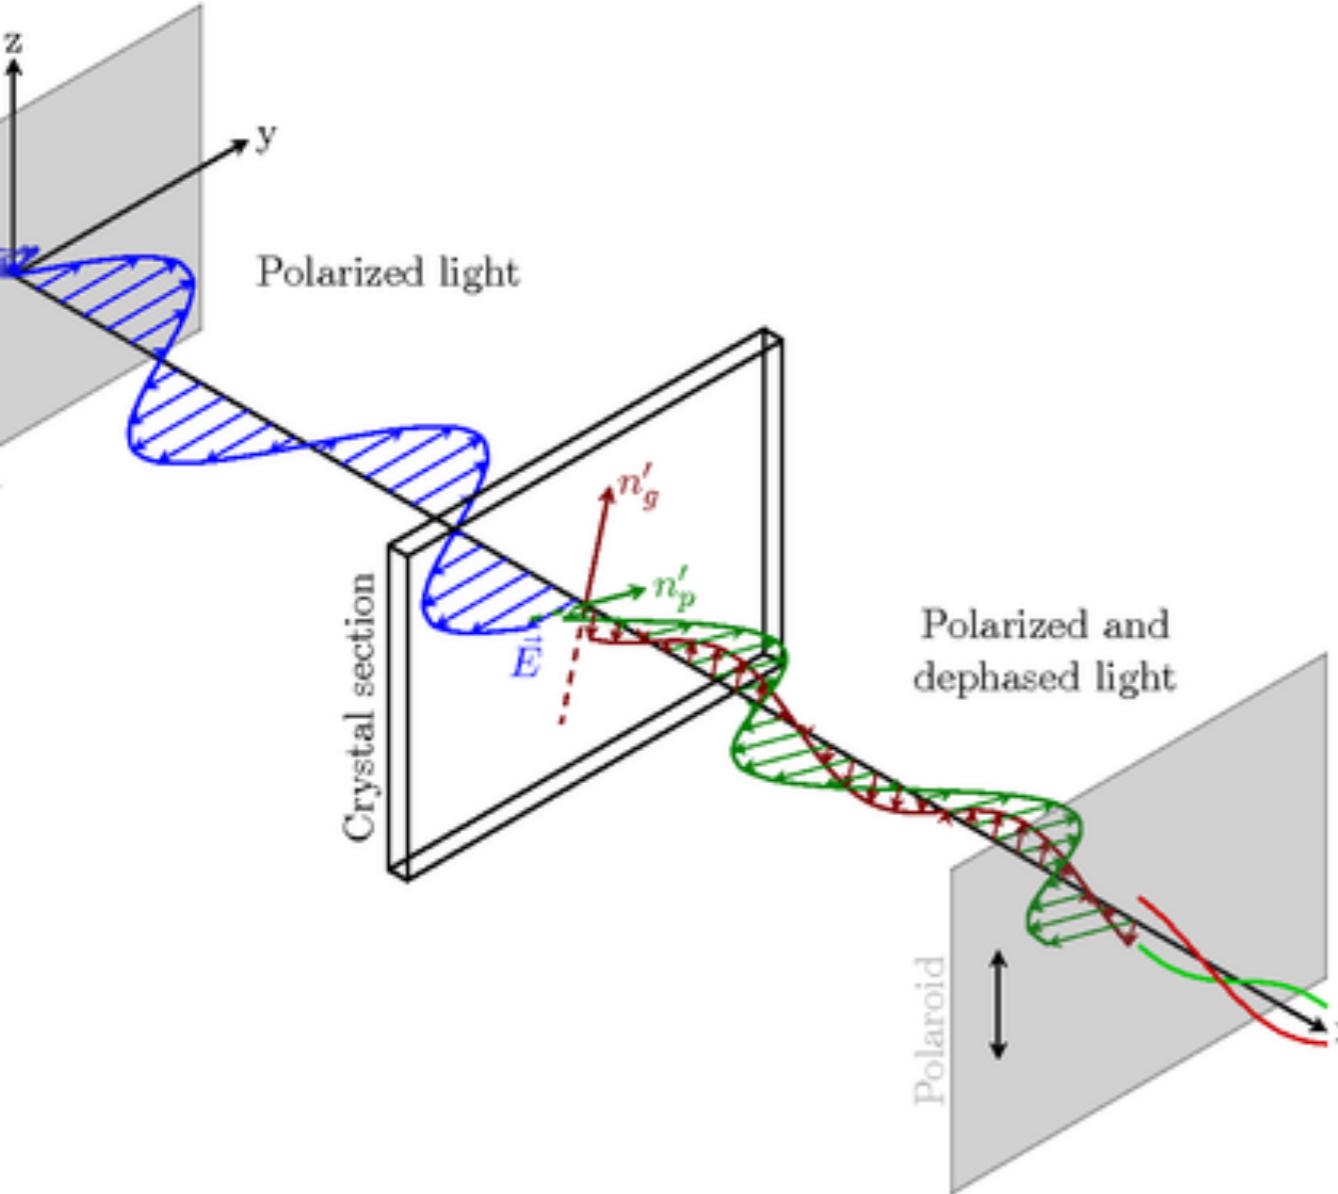

# Light waves

# Polarized microscopy

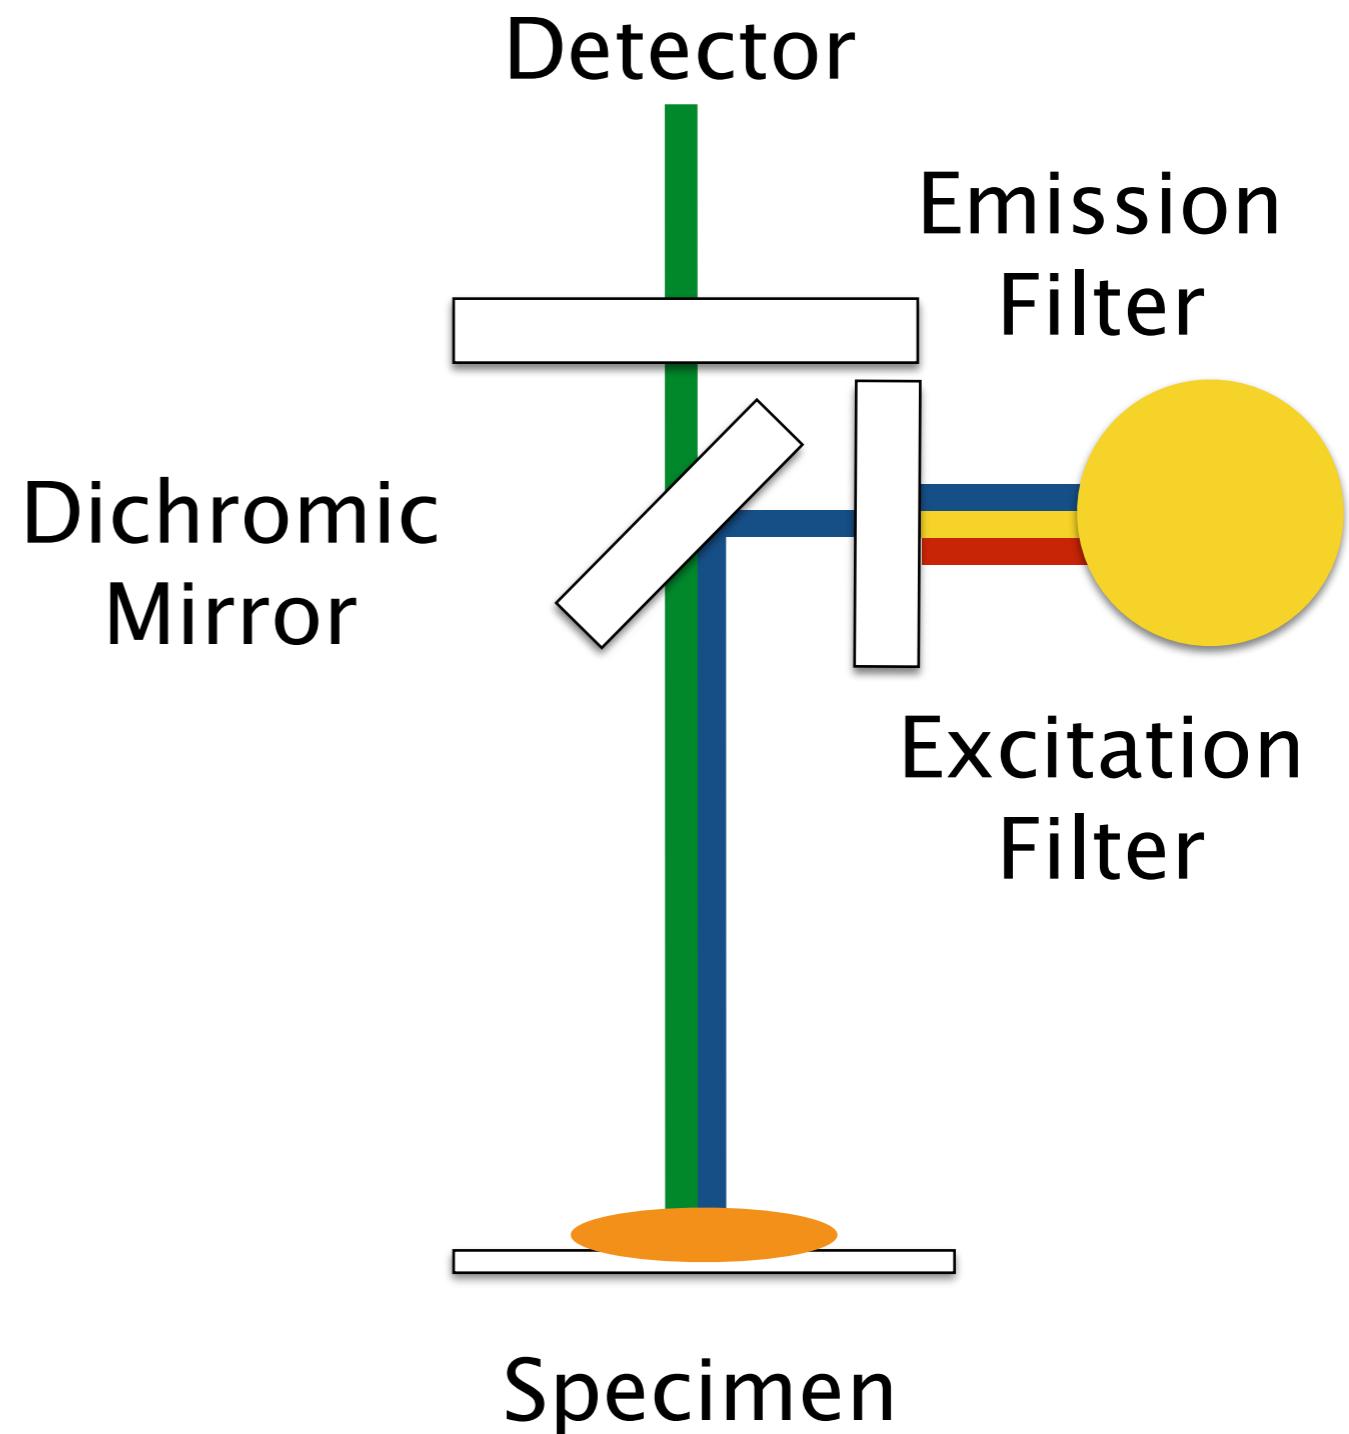

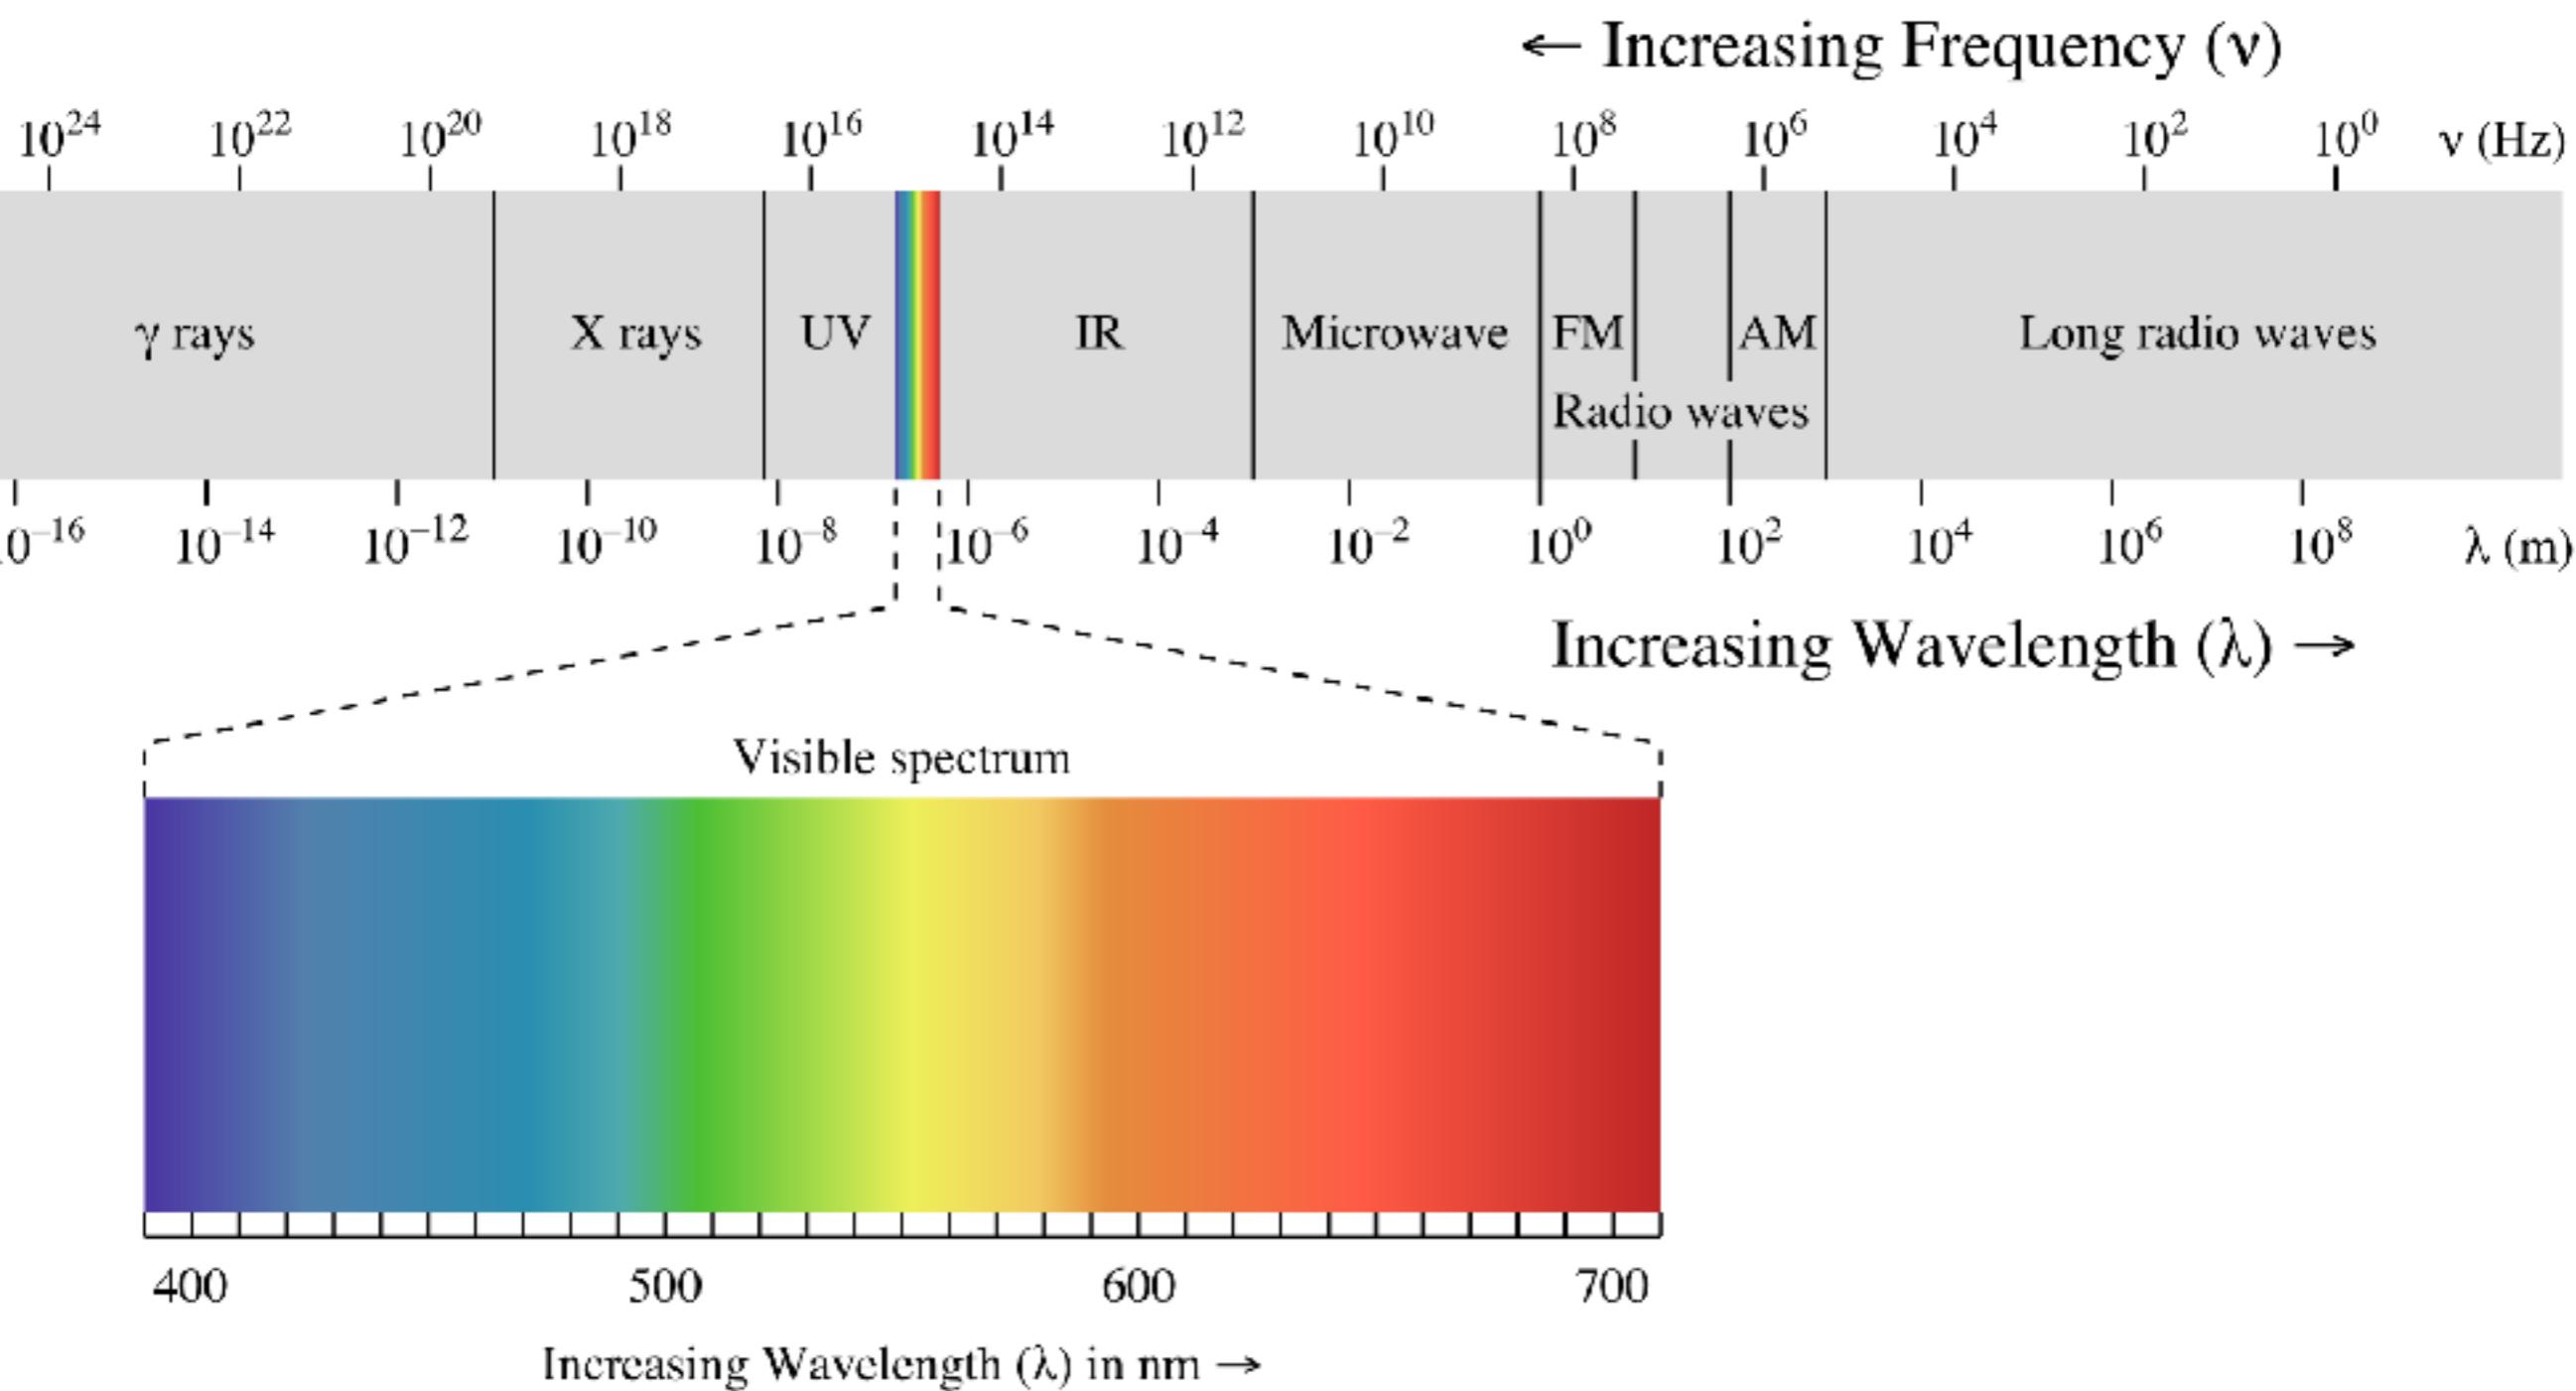

Cyril Langlois CC-BY 2.5

# Fluorescent microscopy

- Excite with low wavelength
- Emits high wavelength
- Most important tool in optic biology

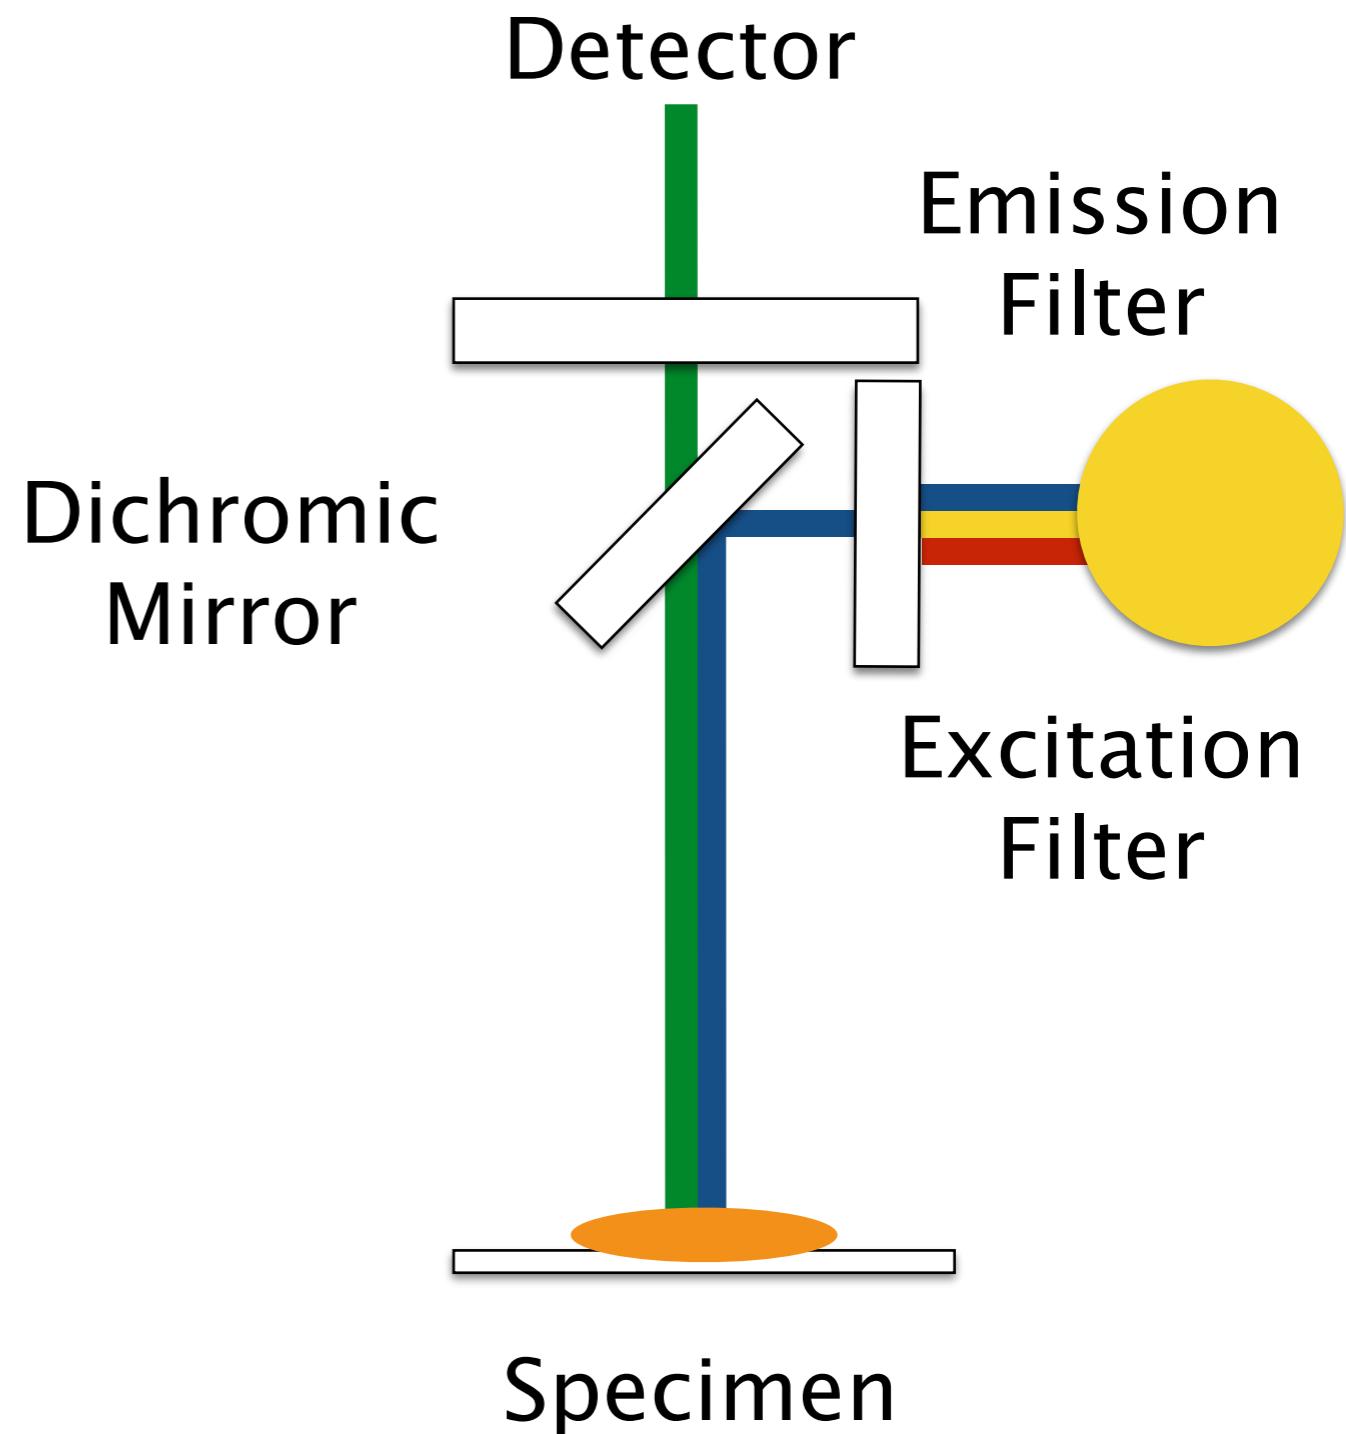

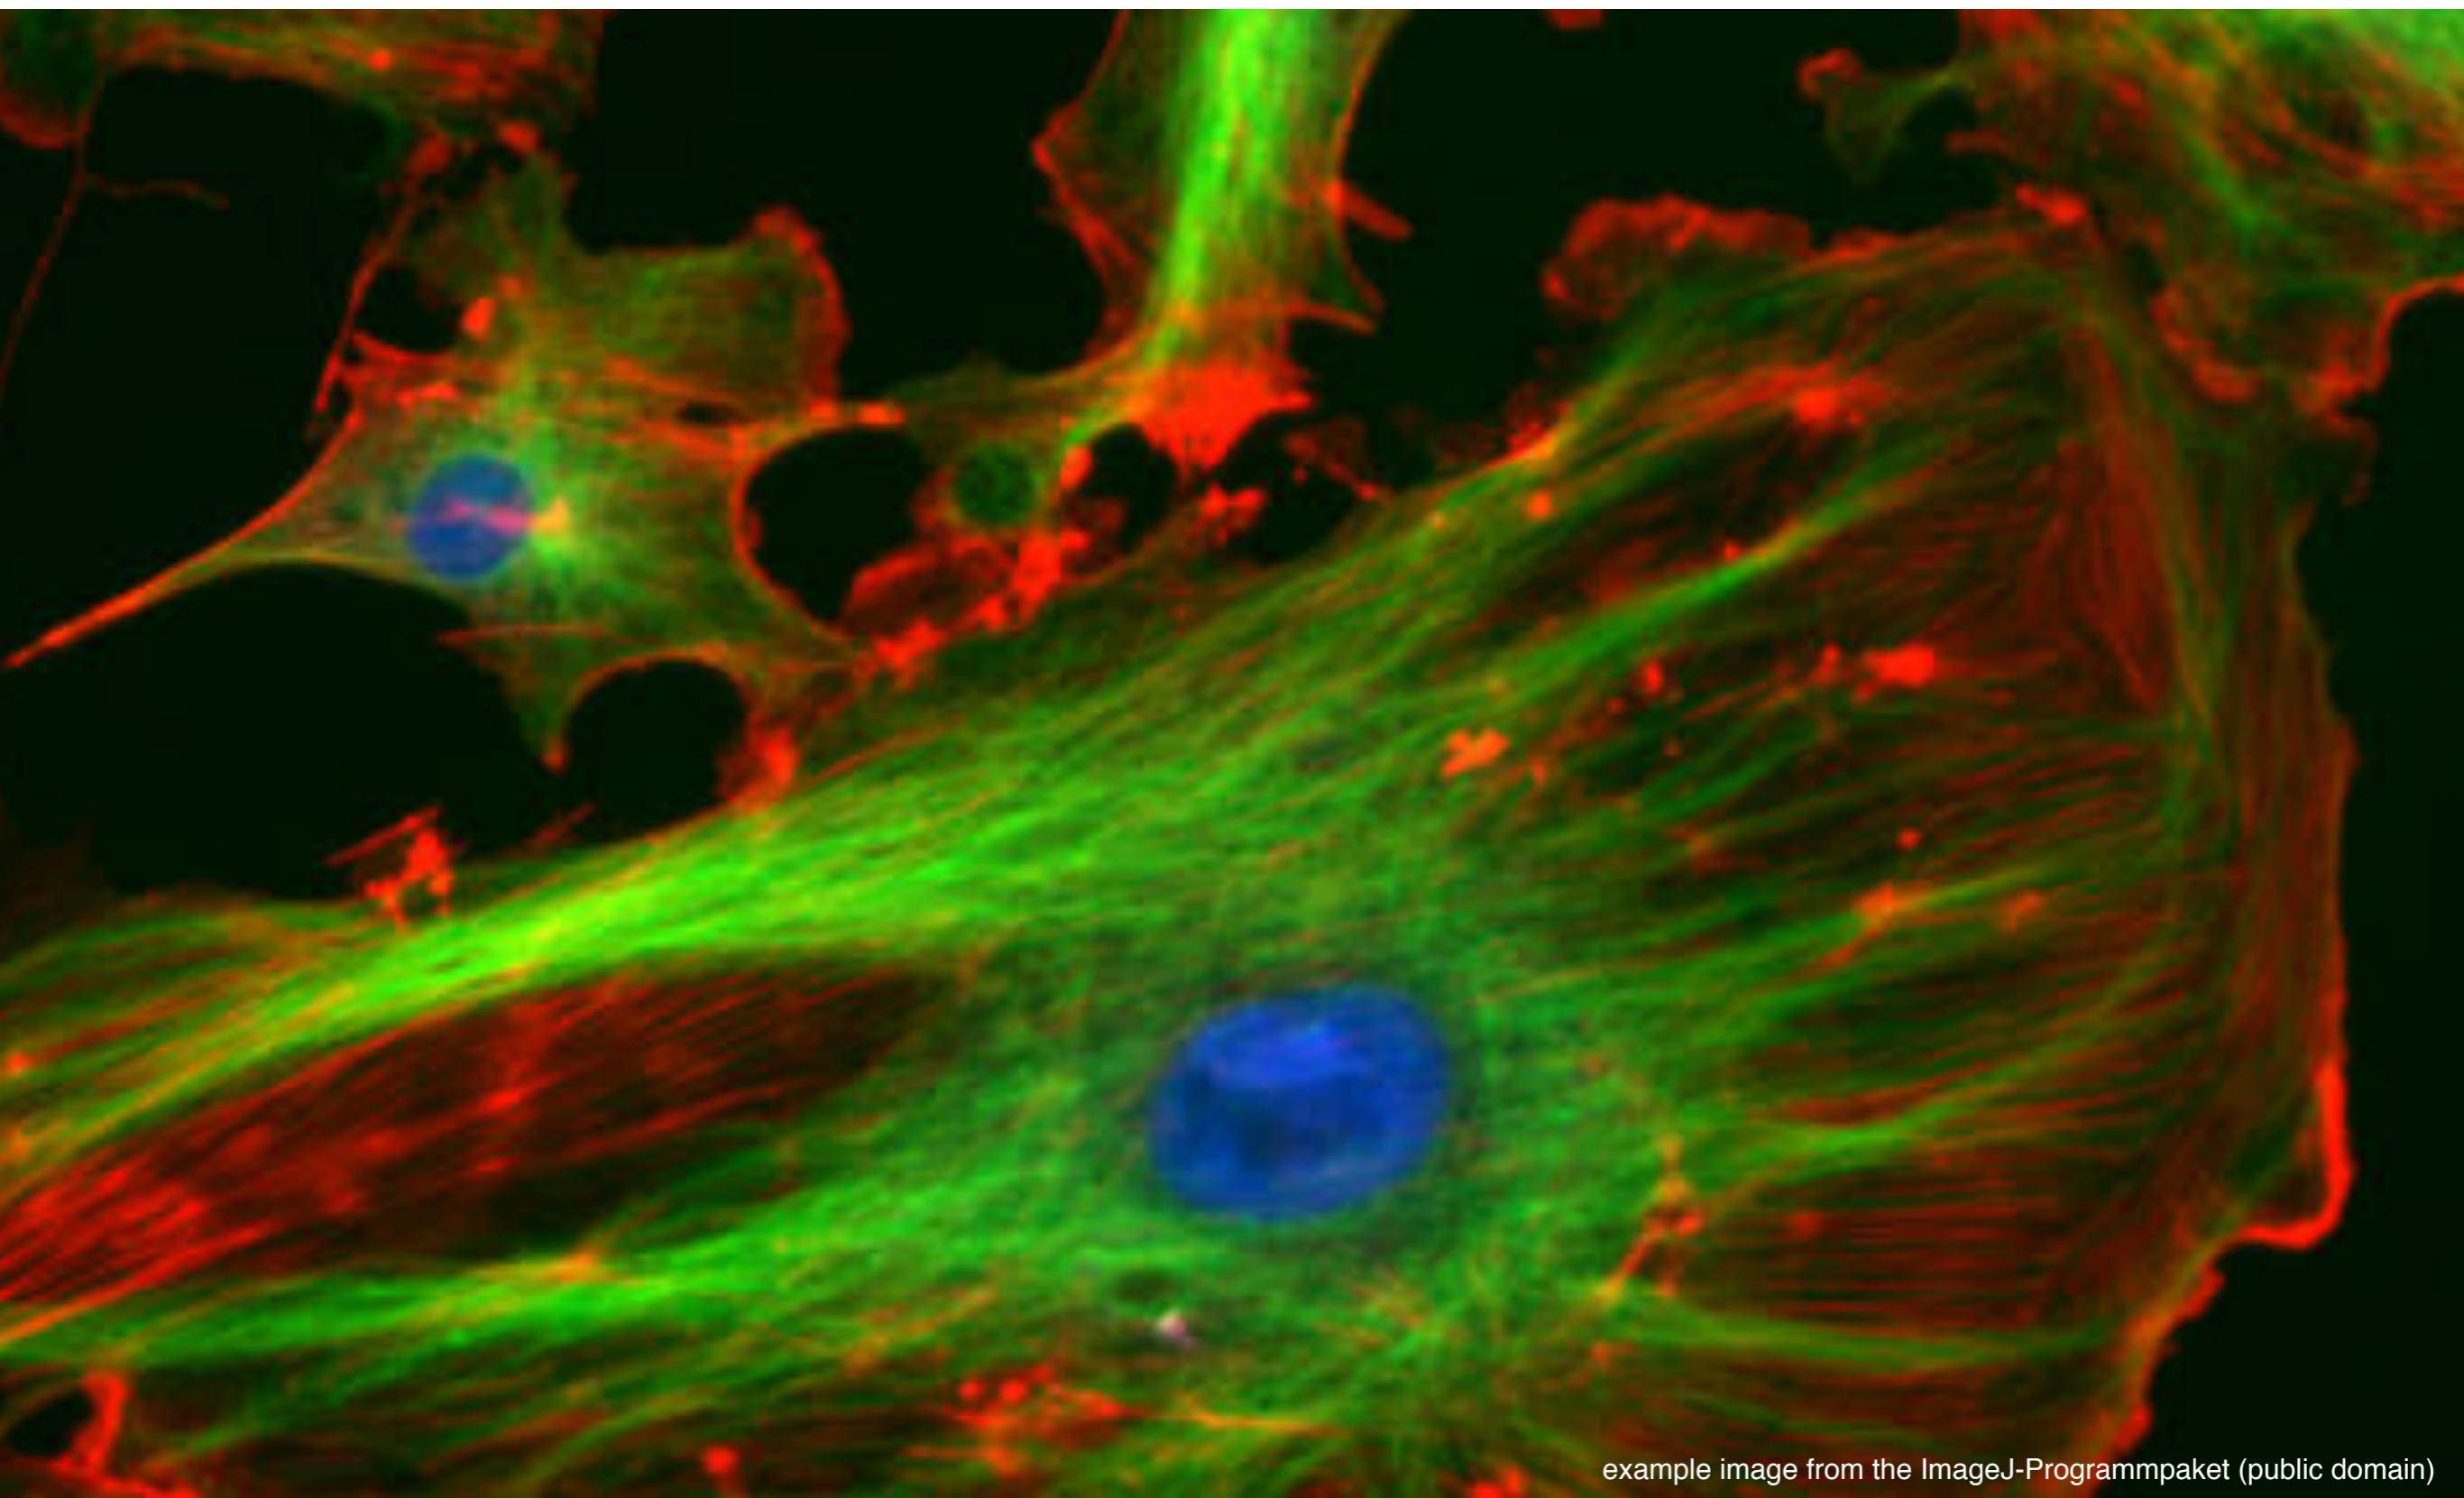

# Fluorescent microscopy

- Excite with low wavelength
- Emits high wavelength
- Most important tool in optic biology

# Fluorescence microscopy

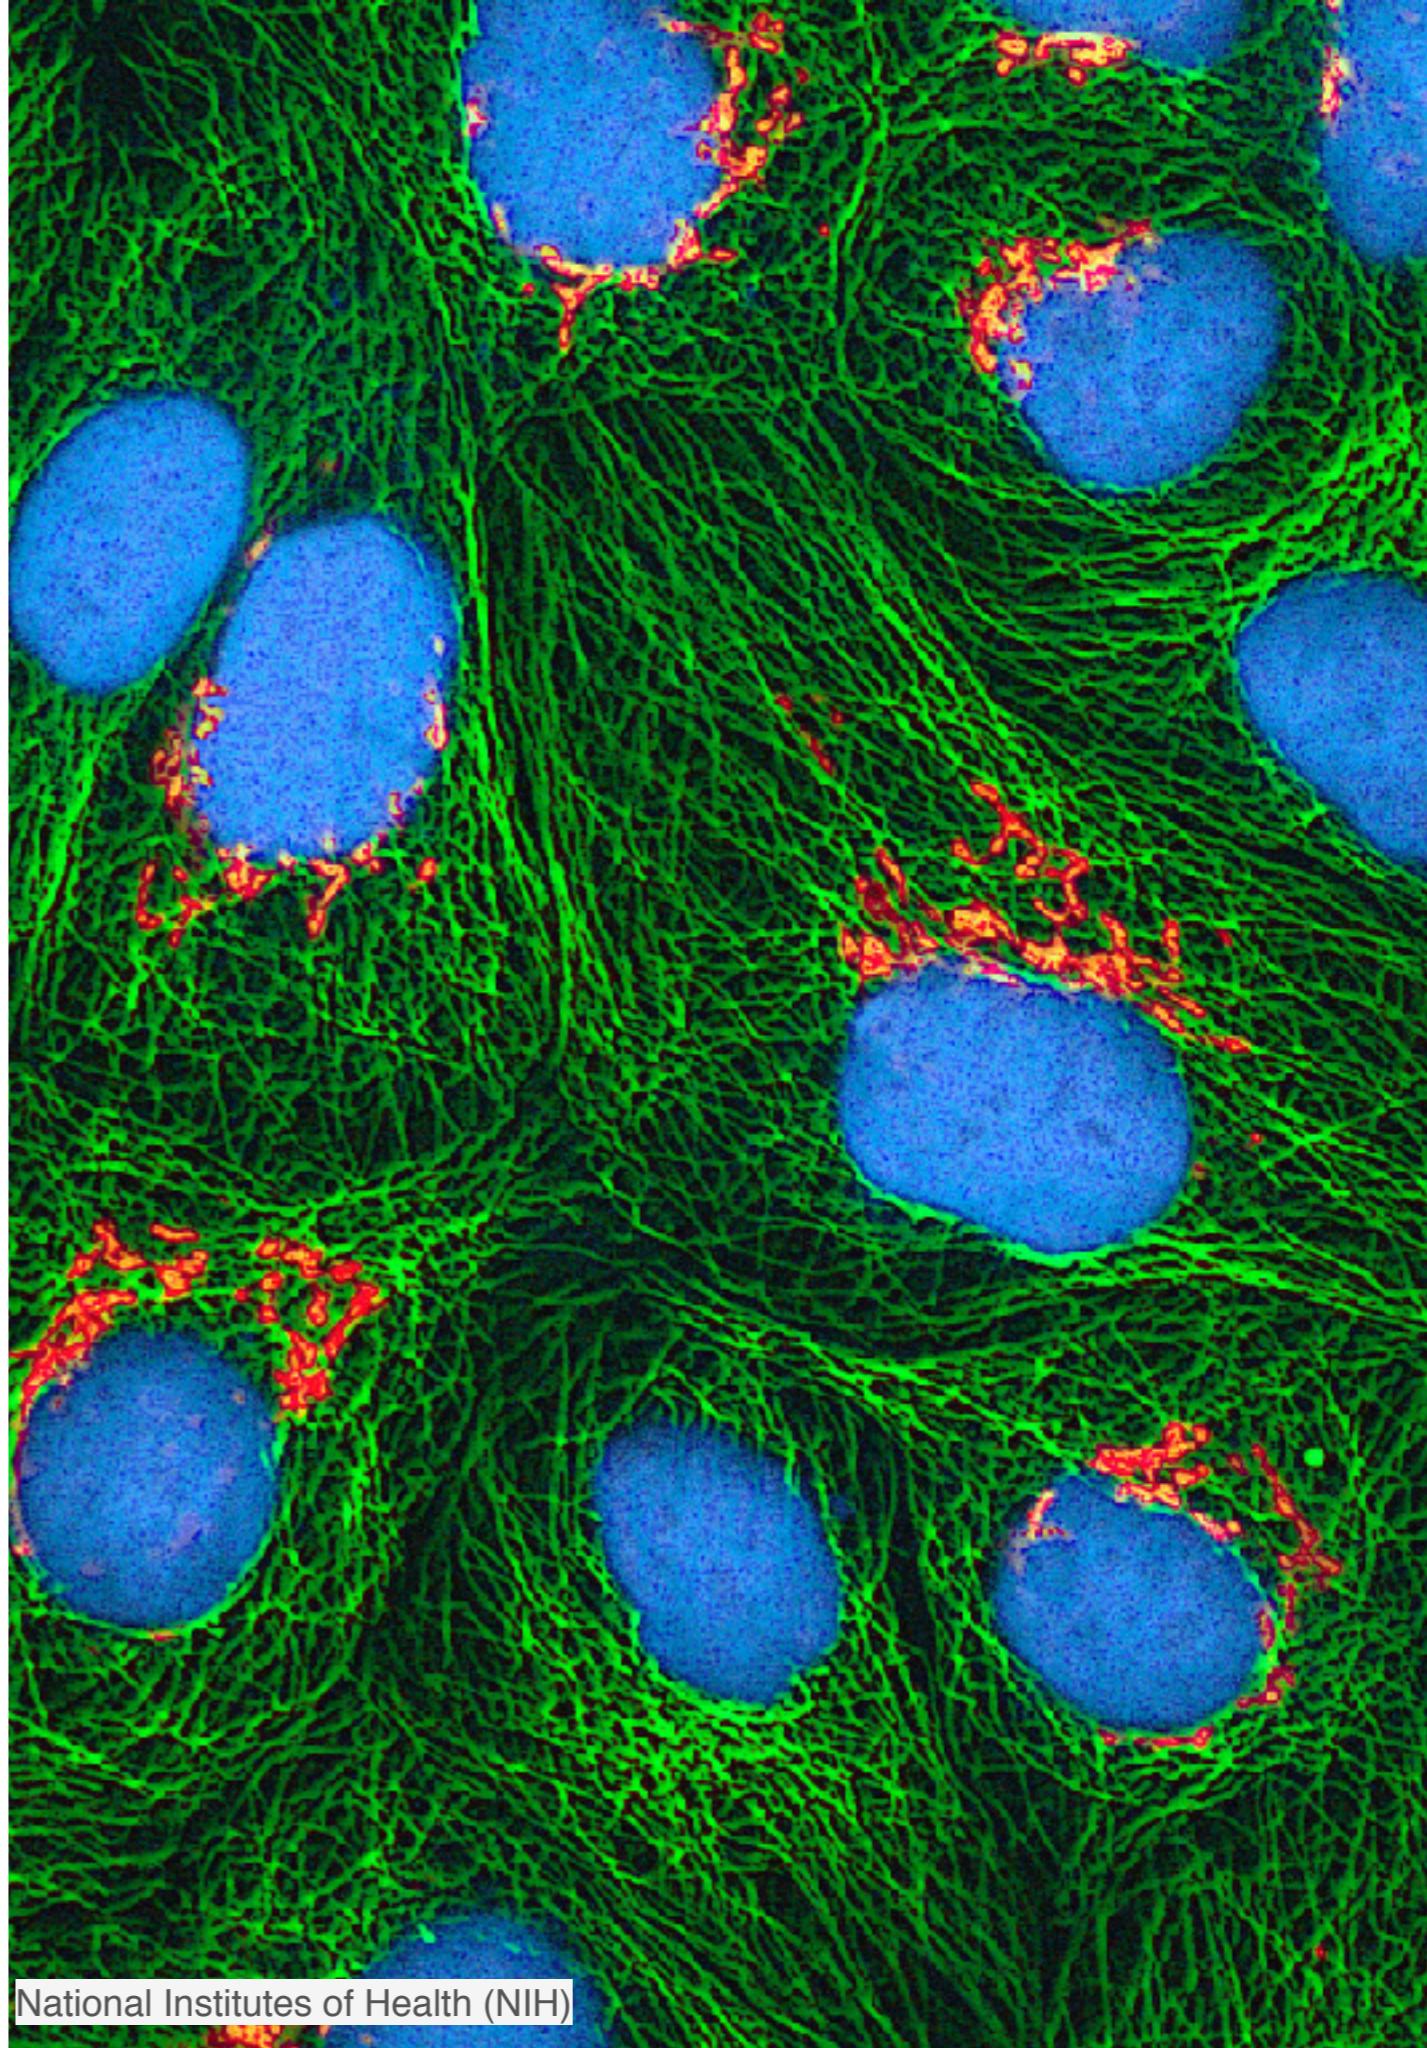

example image from the ImageJ-Programmpaket (public domain)

## Laser scanning microscopy

- Scan an image point by point
- Much better focus than other techniques

**Optics**

# Refraction

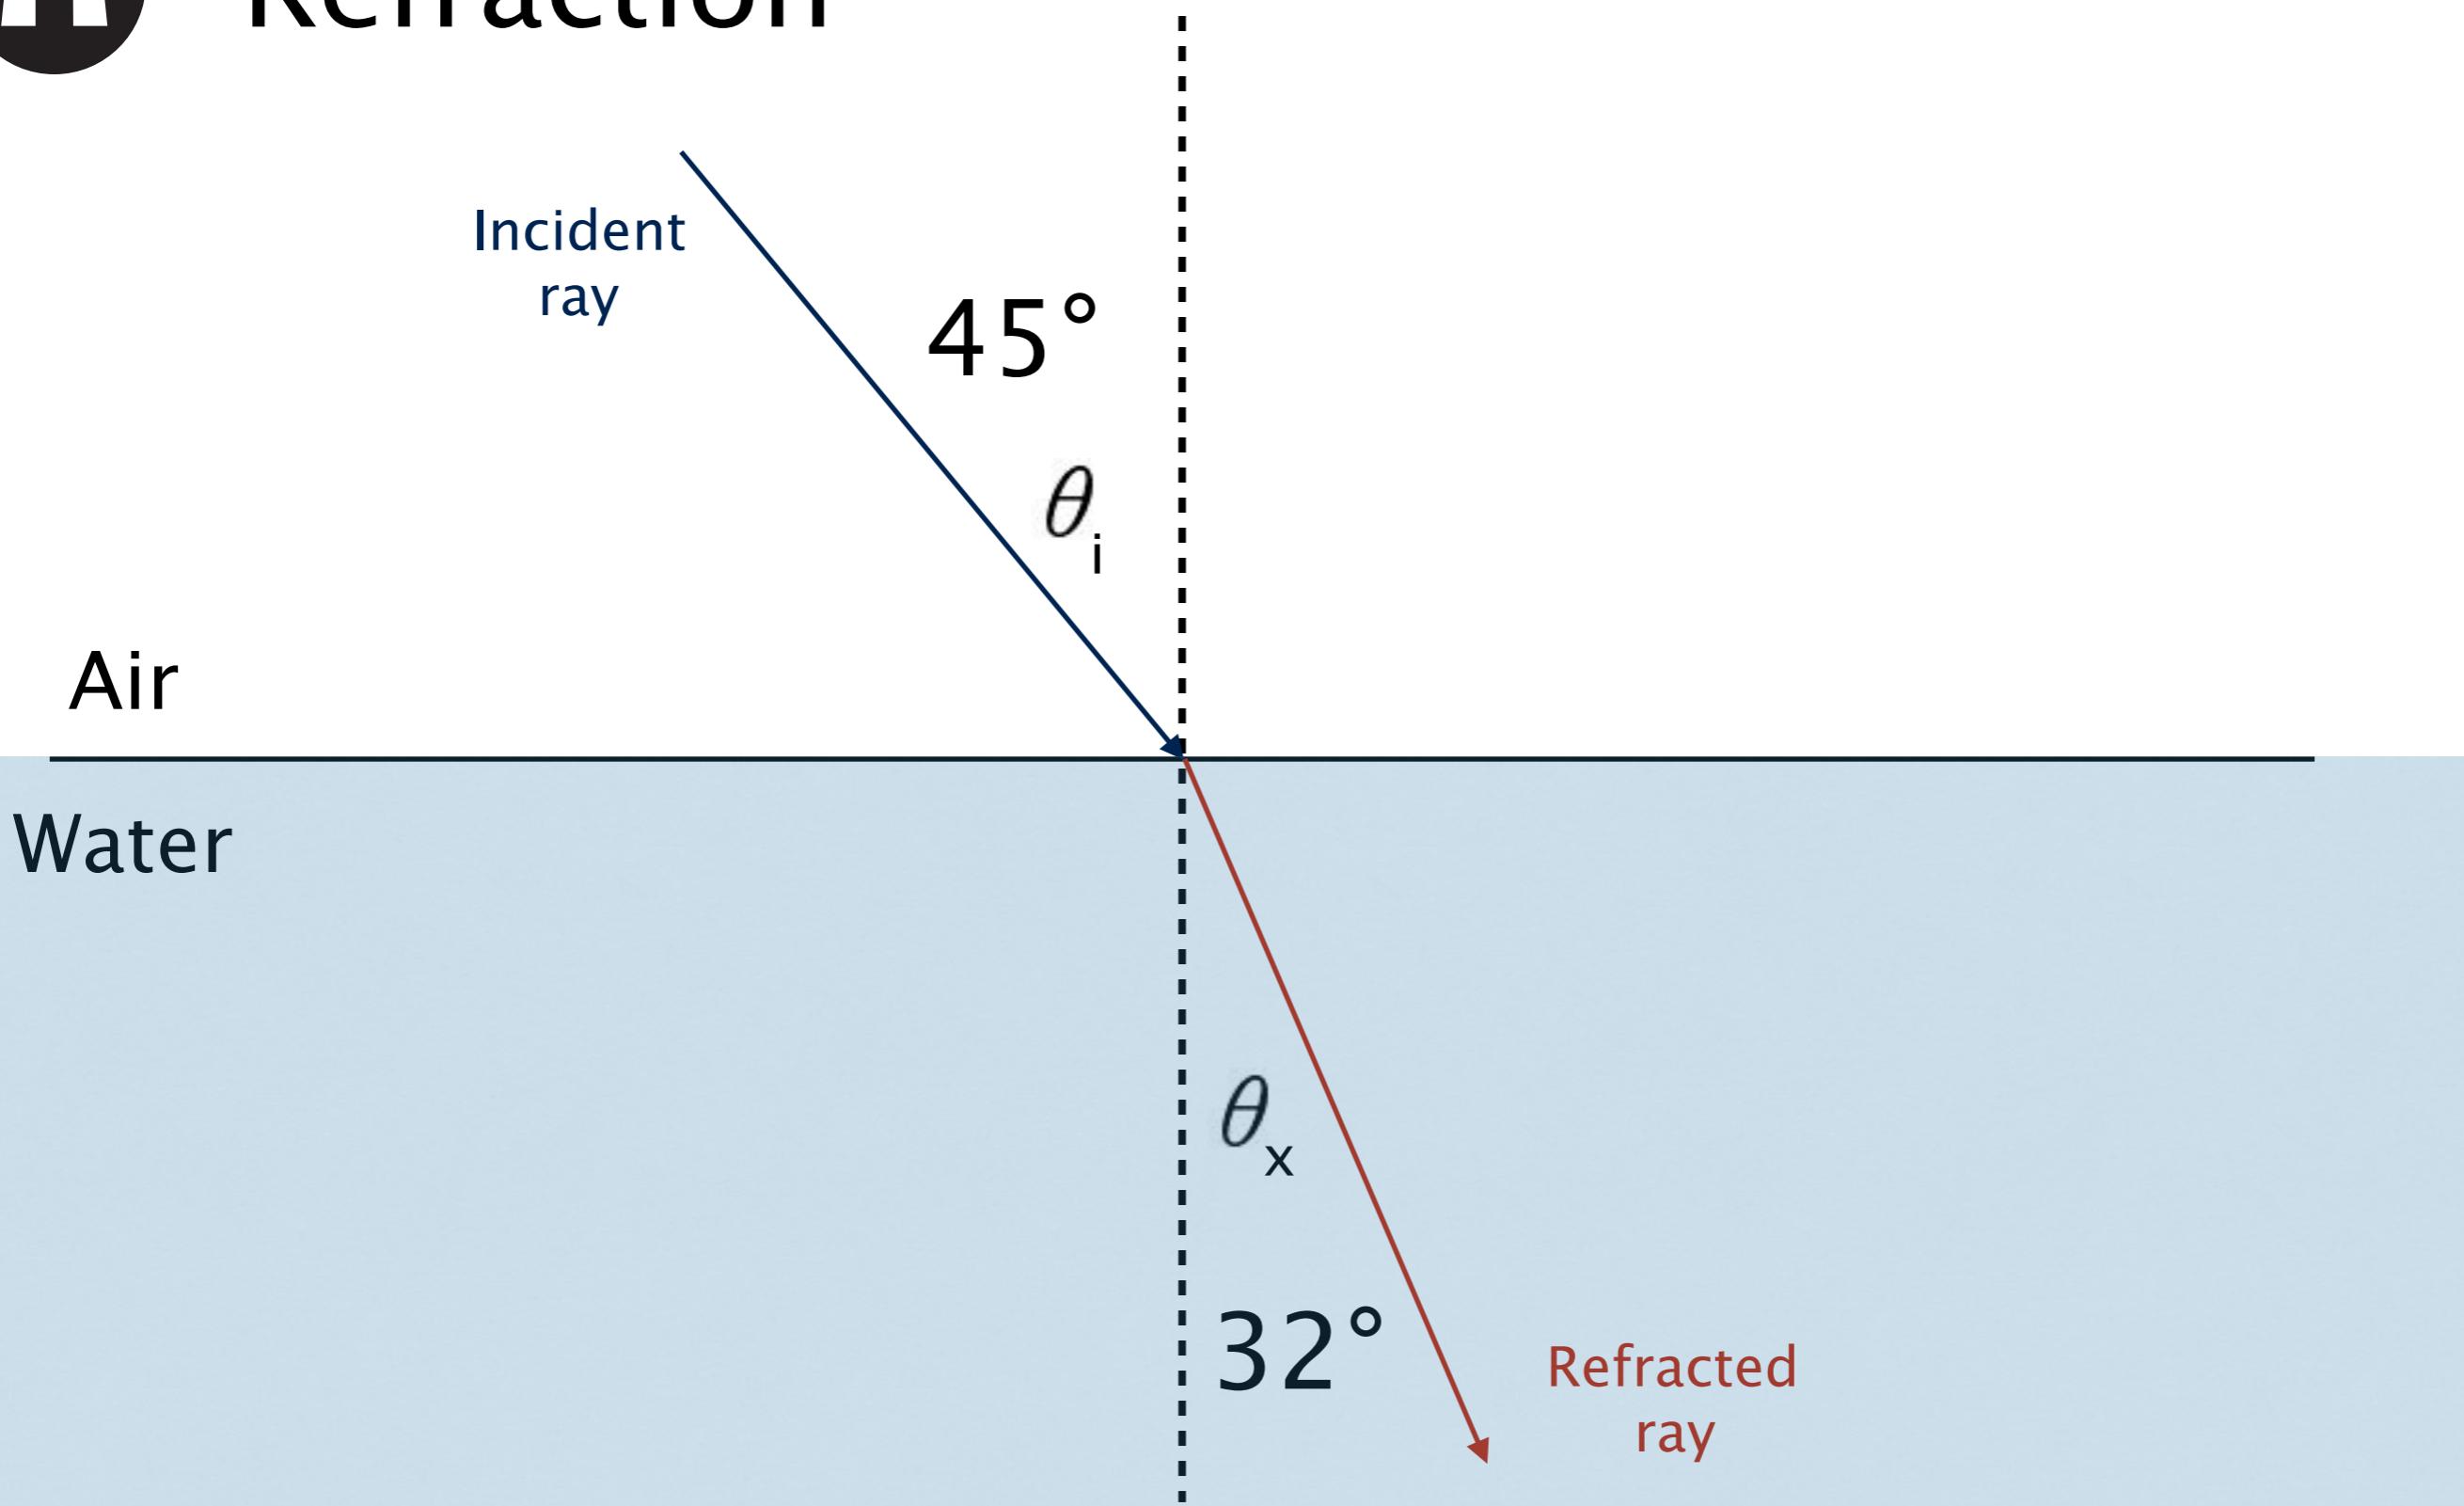

$\theta_i$  Angle of incidence

$\theta_x$  Angle of refraction

# Refraction

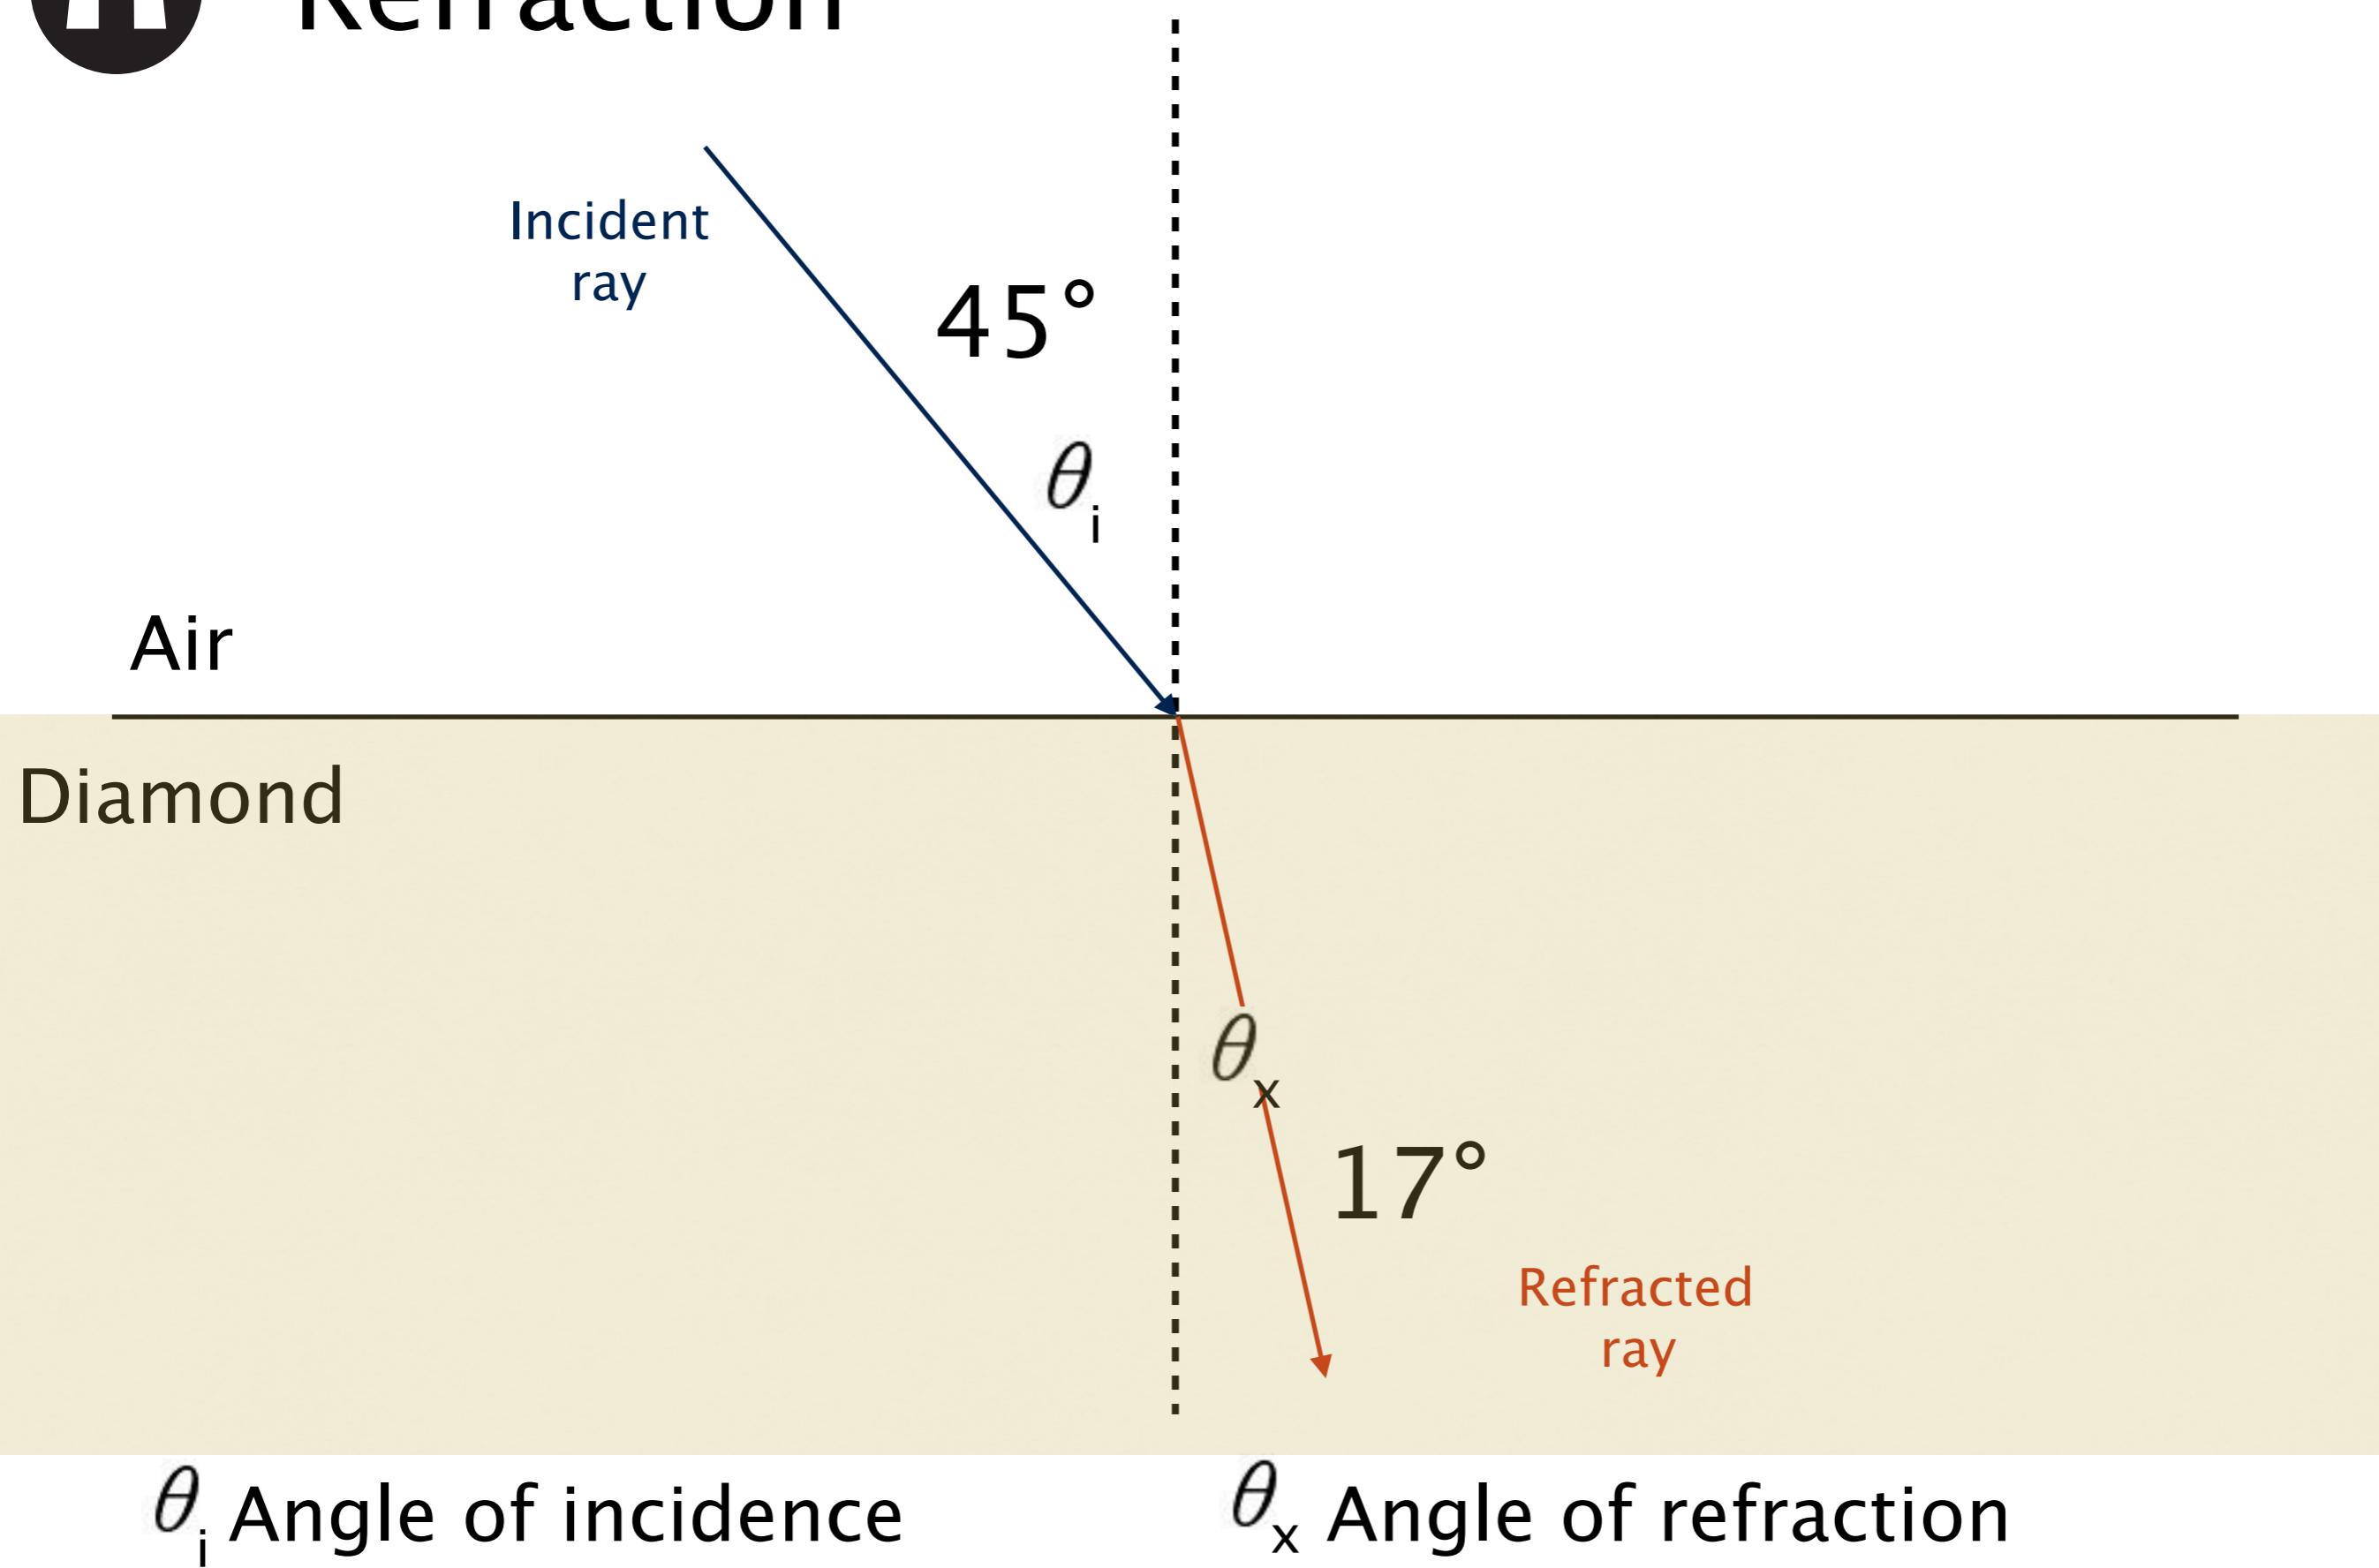

$\theta_i$  Angle of incidence

$\theta_x$  Angle of refraction

# Refraction

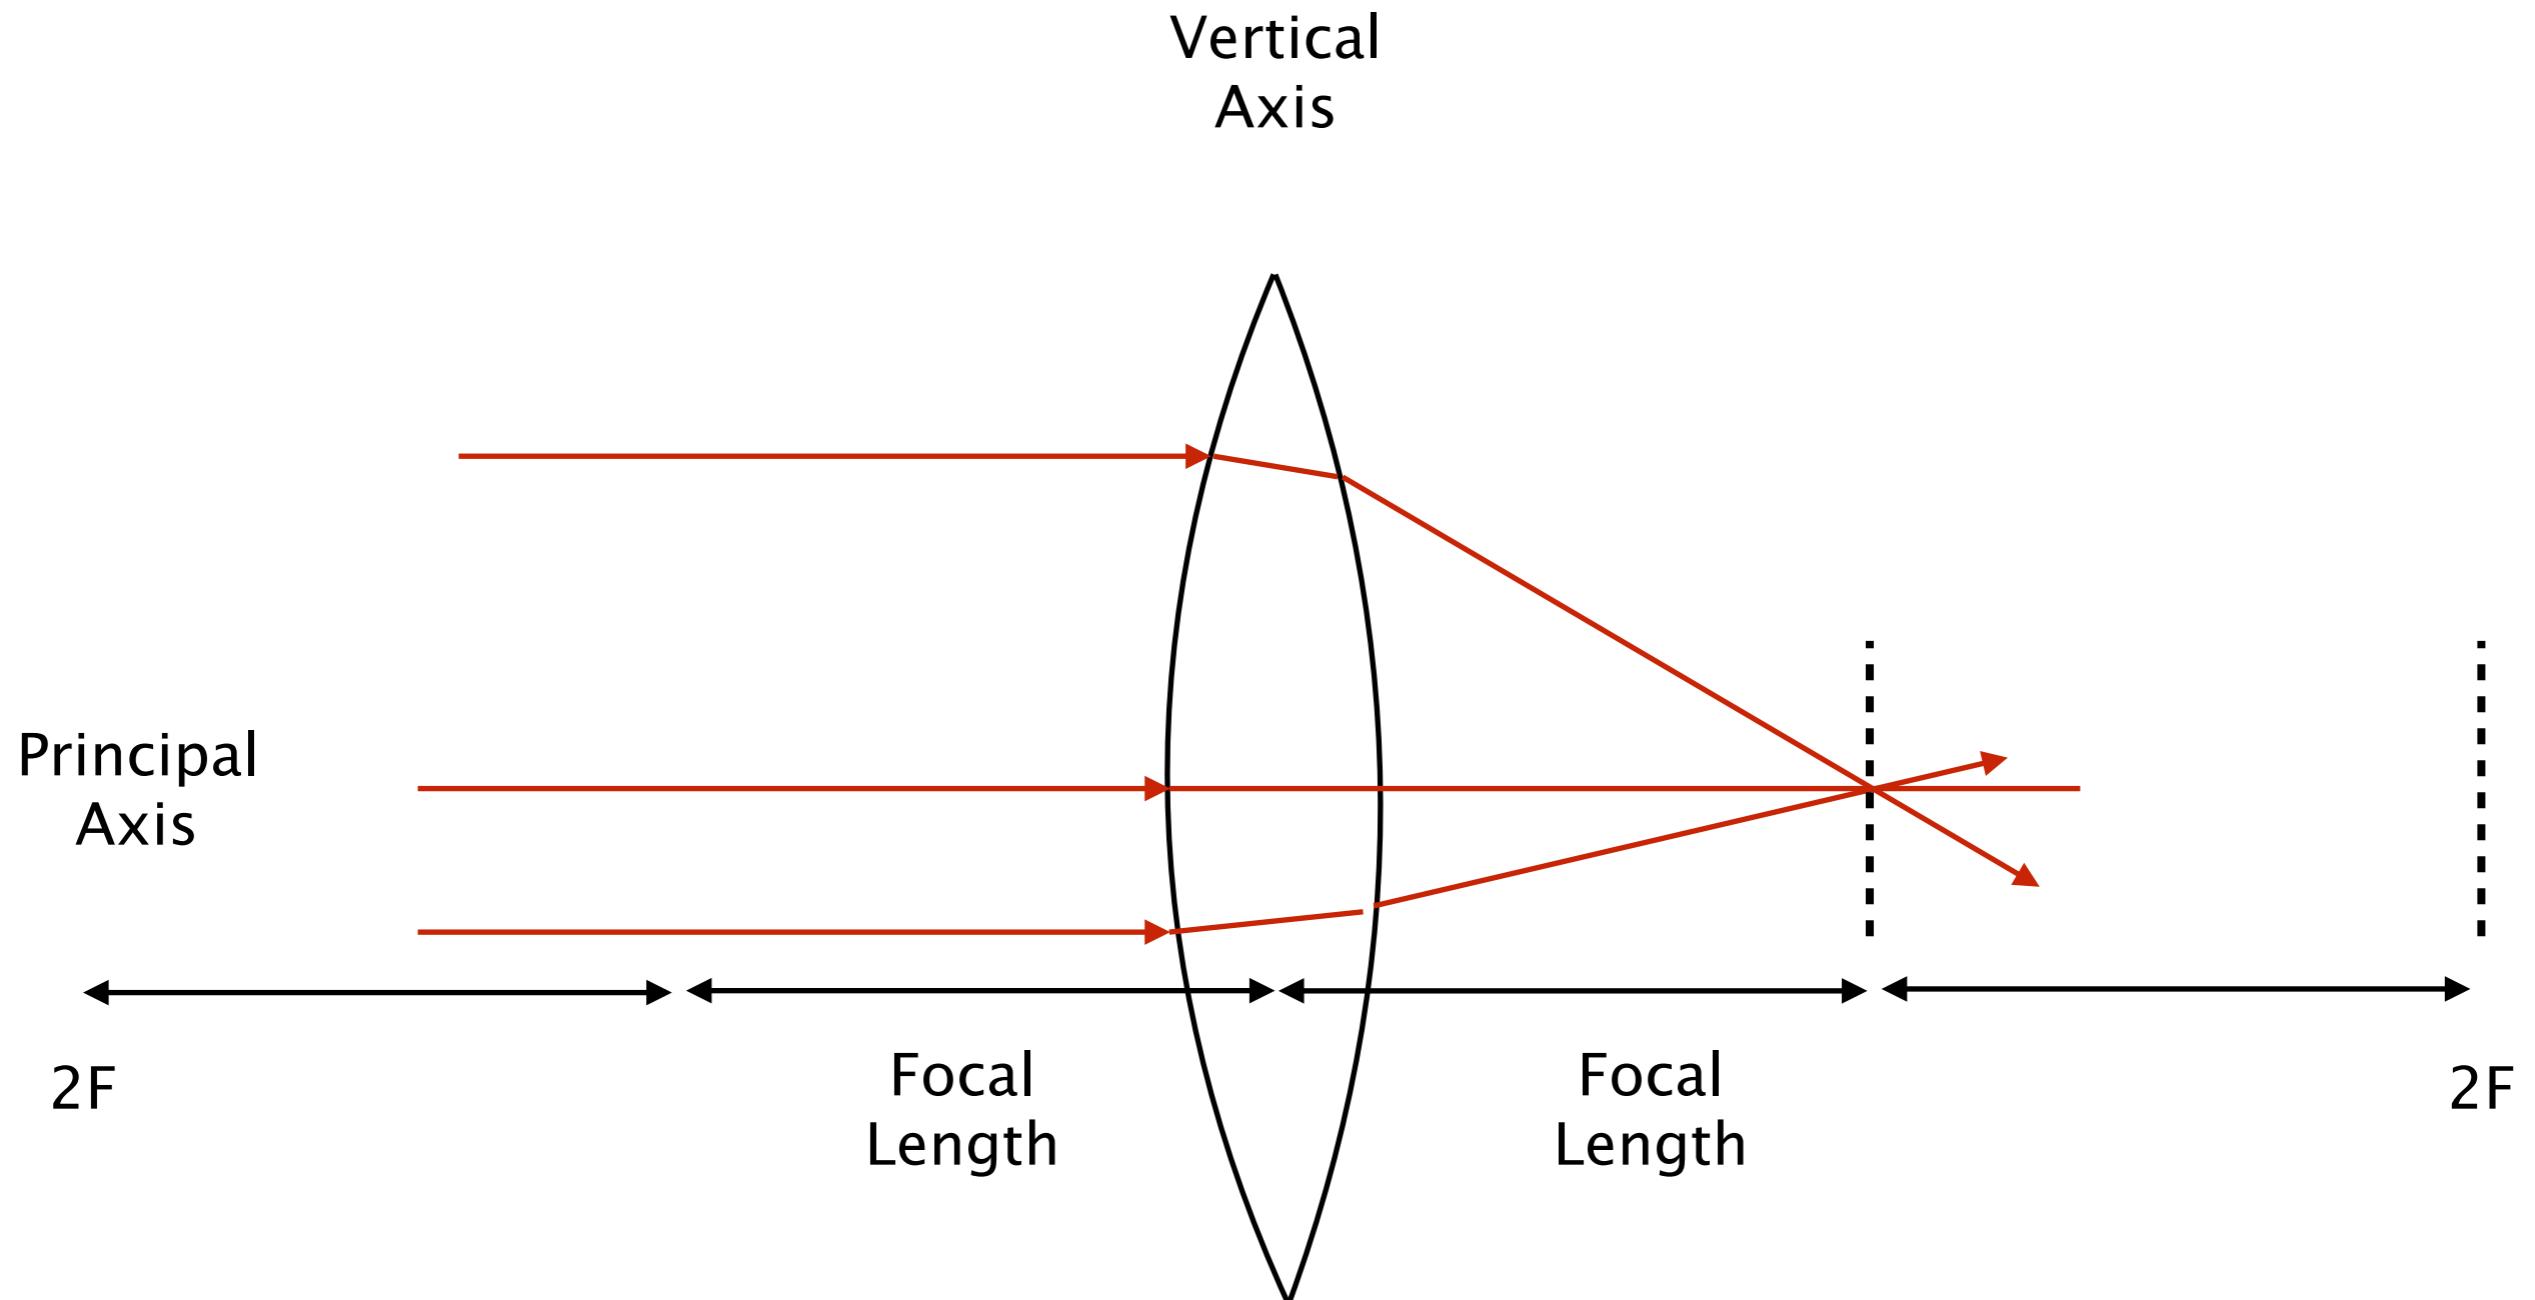

# Snell's Law

$$\sin(\theta_i) = n_{material} \times \sin(\theta_x)$$

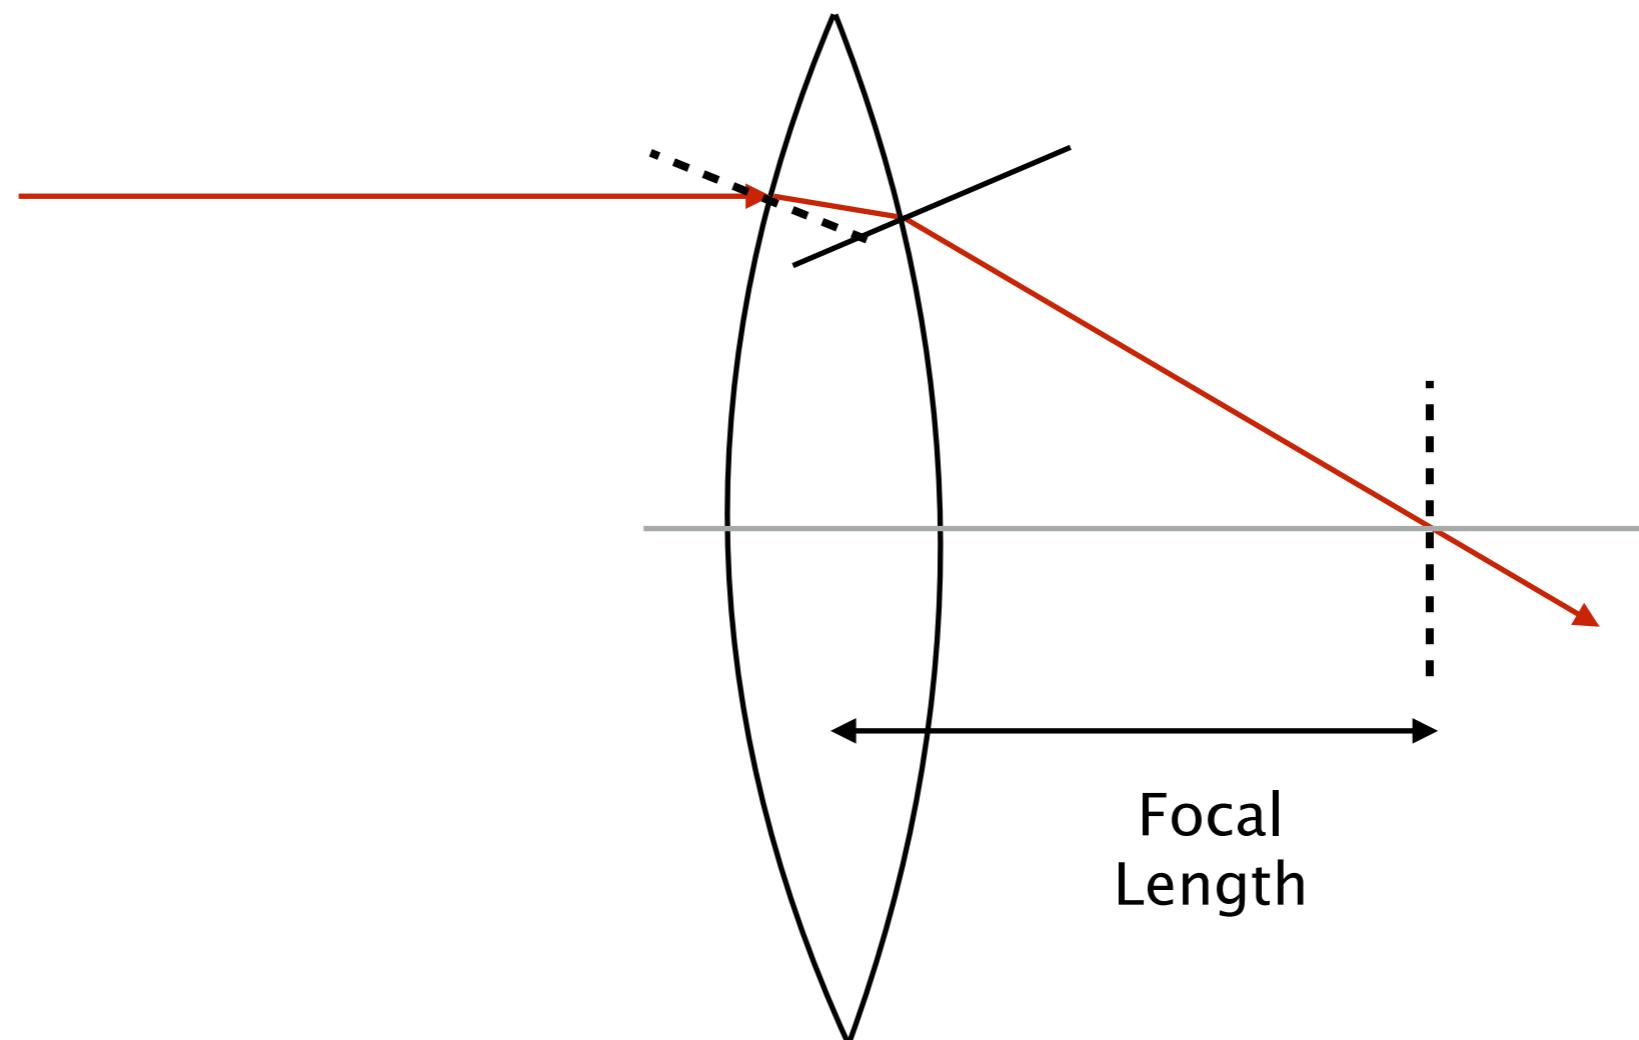

# Anatomy of a Lens

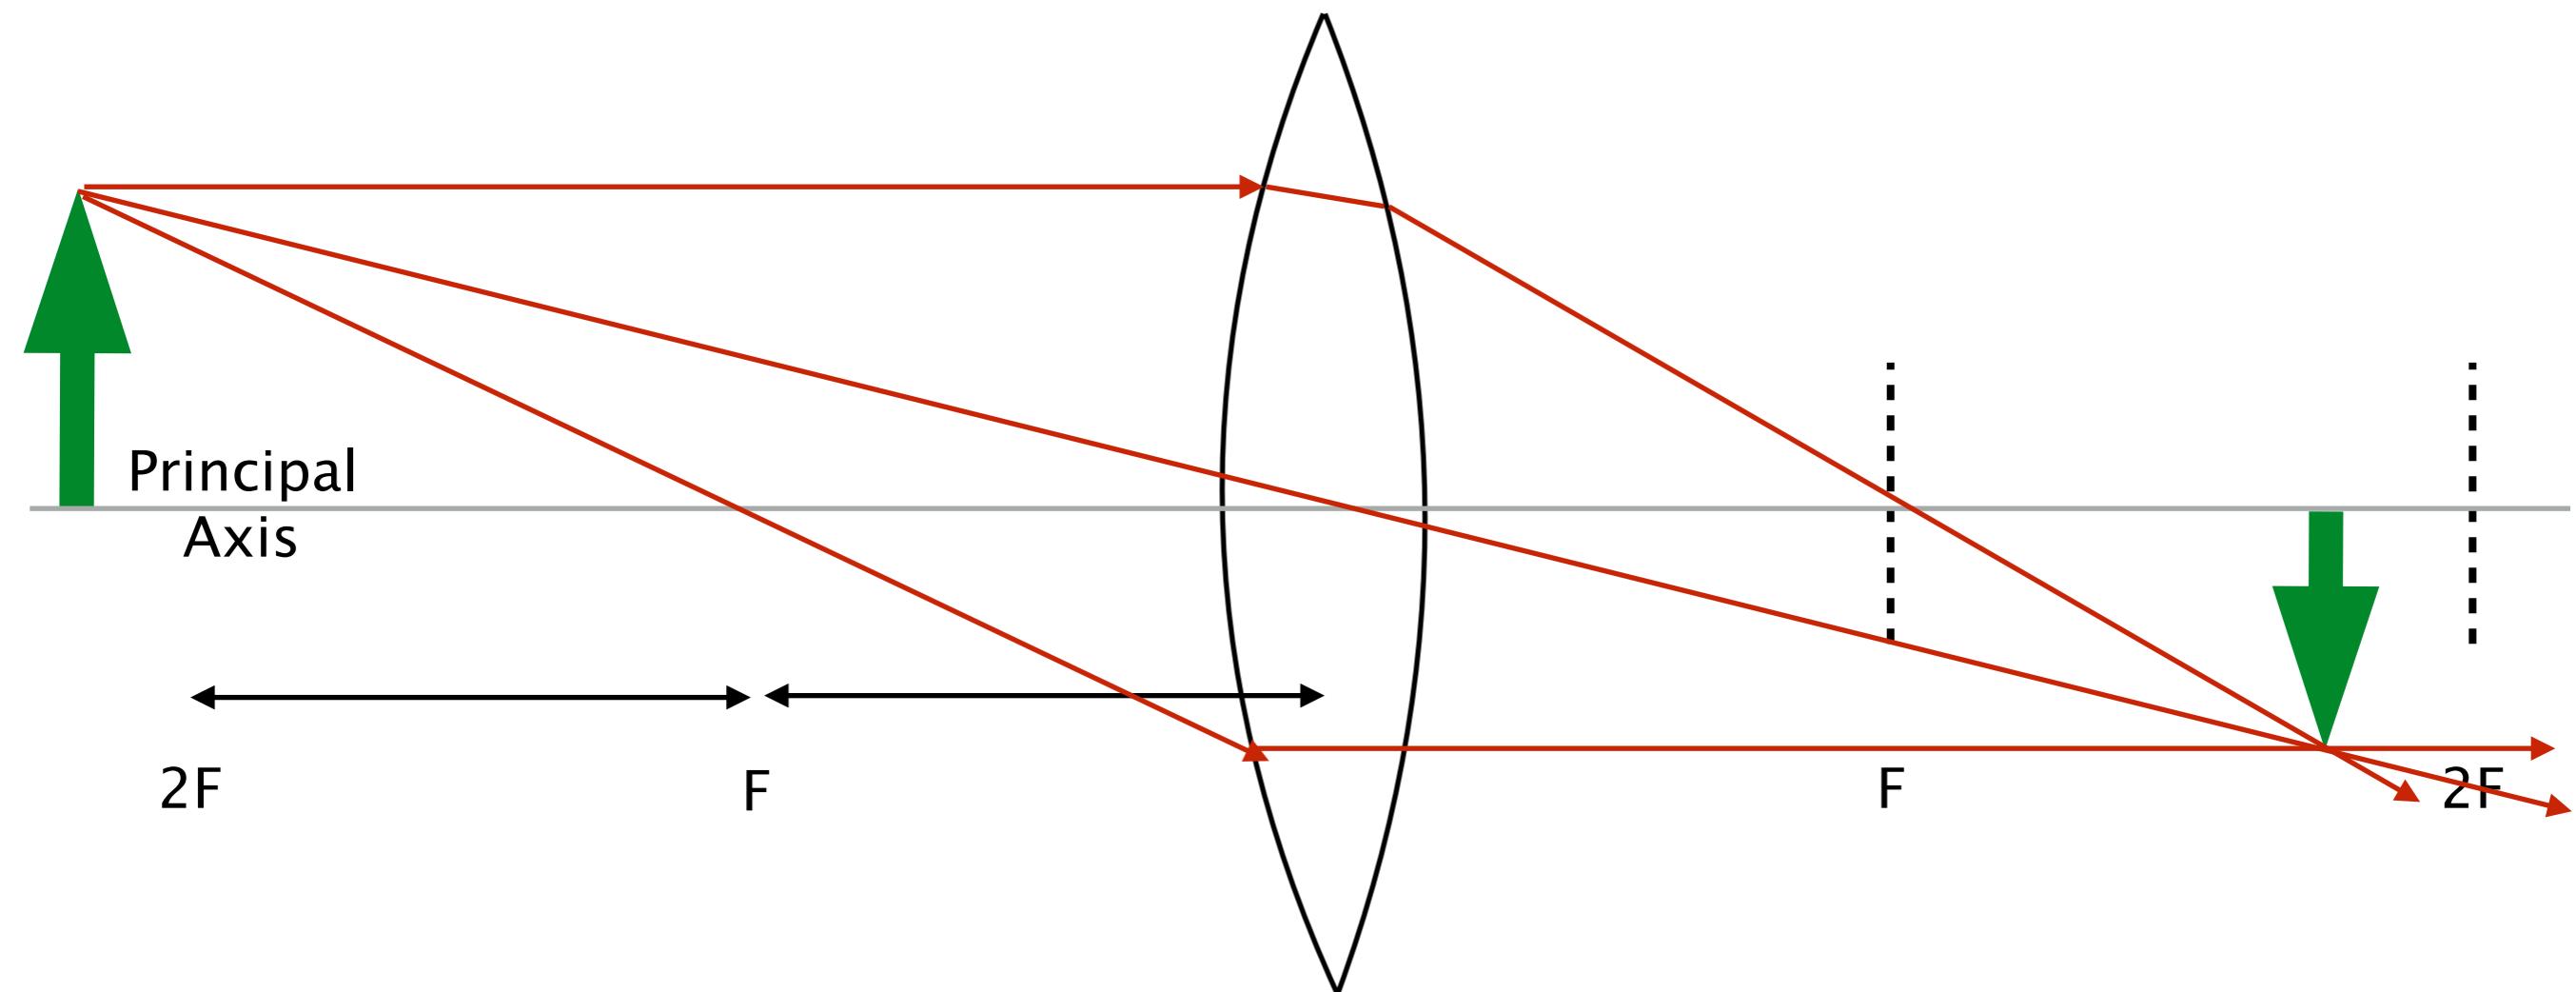

# Refraction in a lens

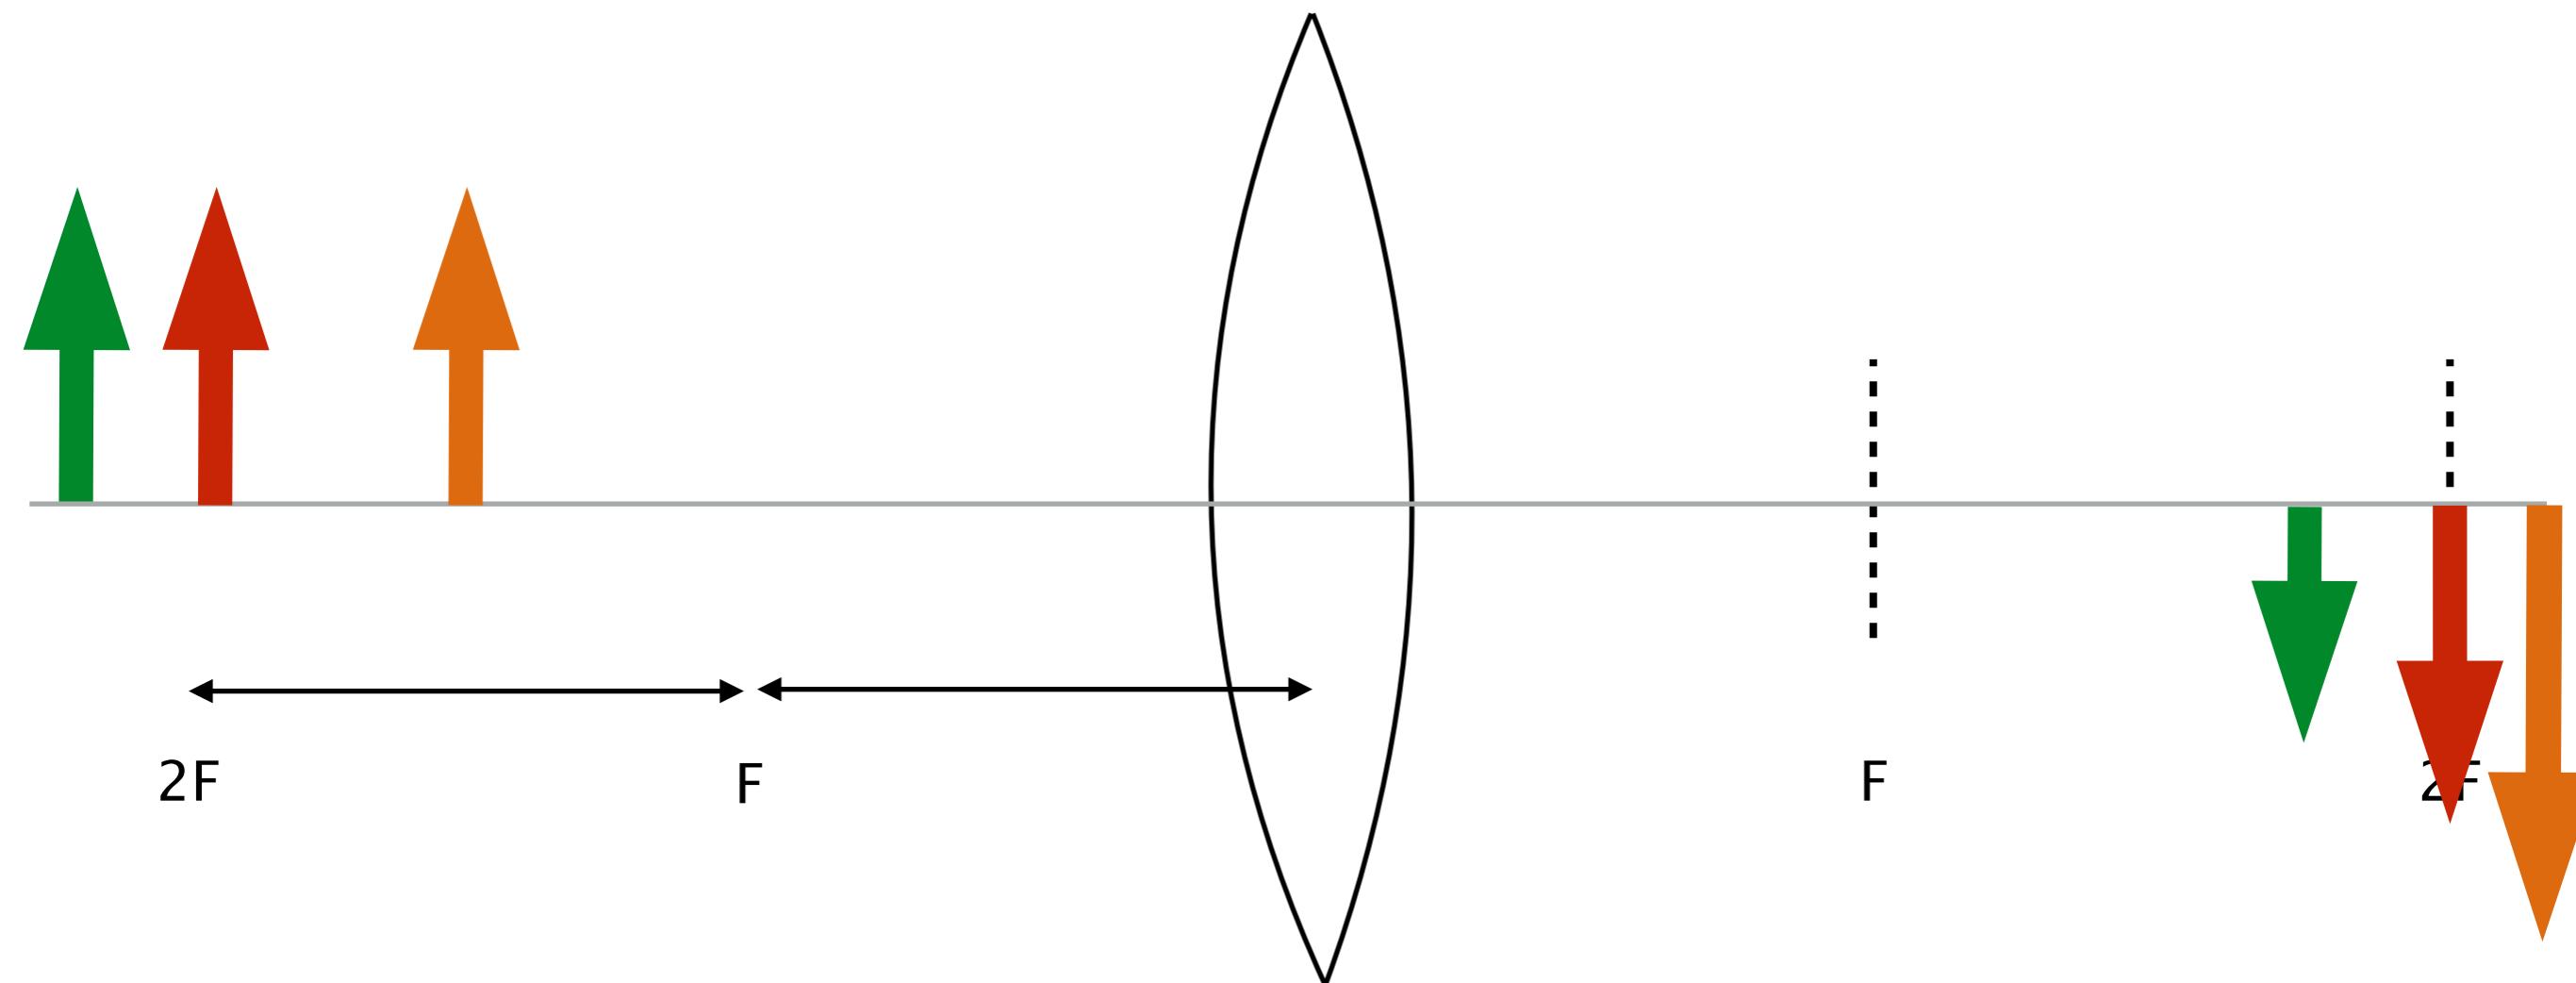

# Image construction

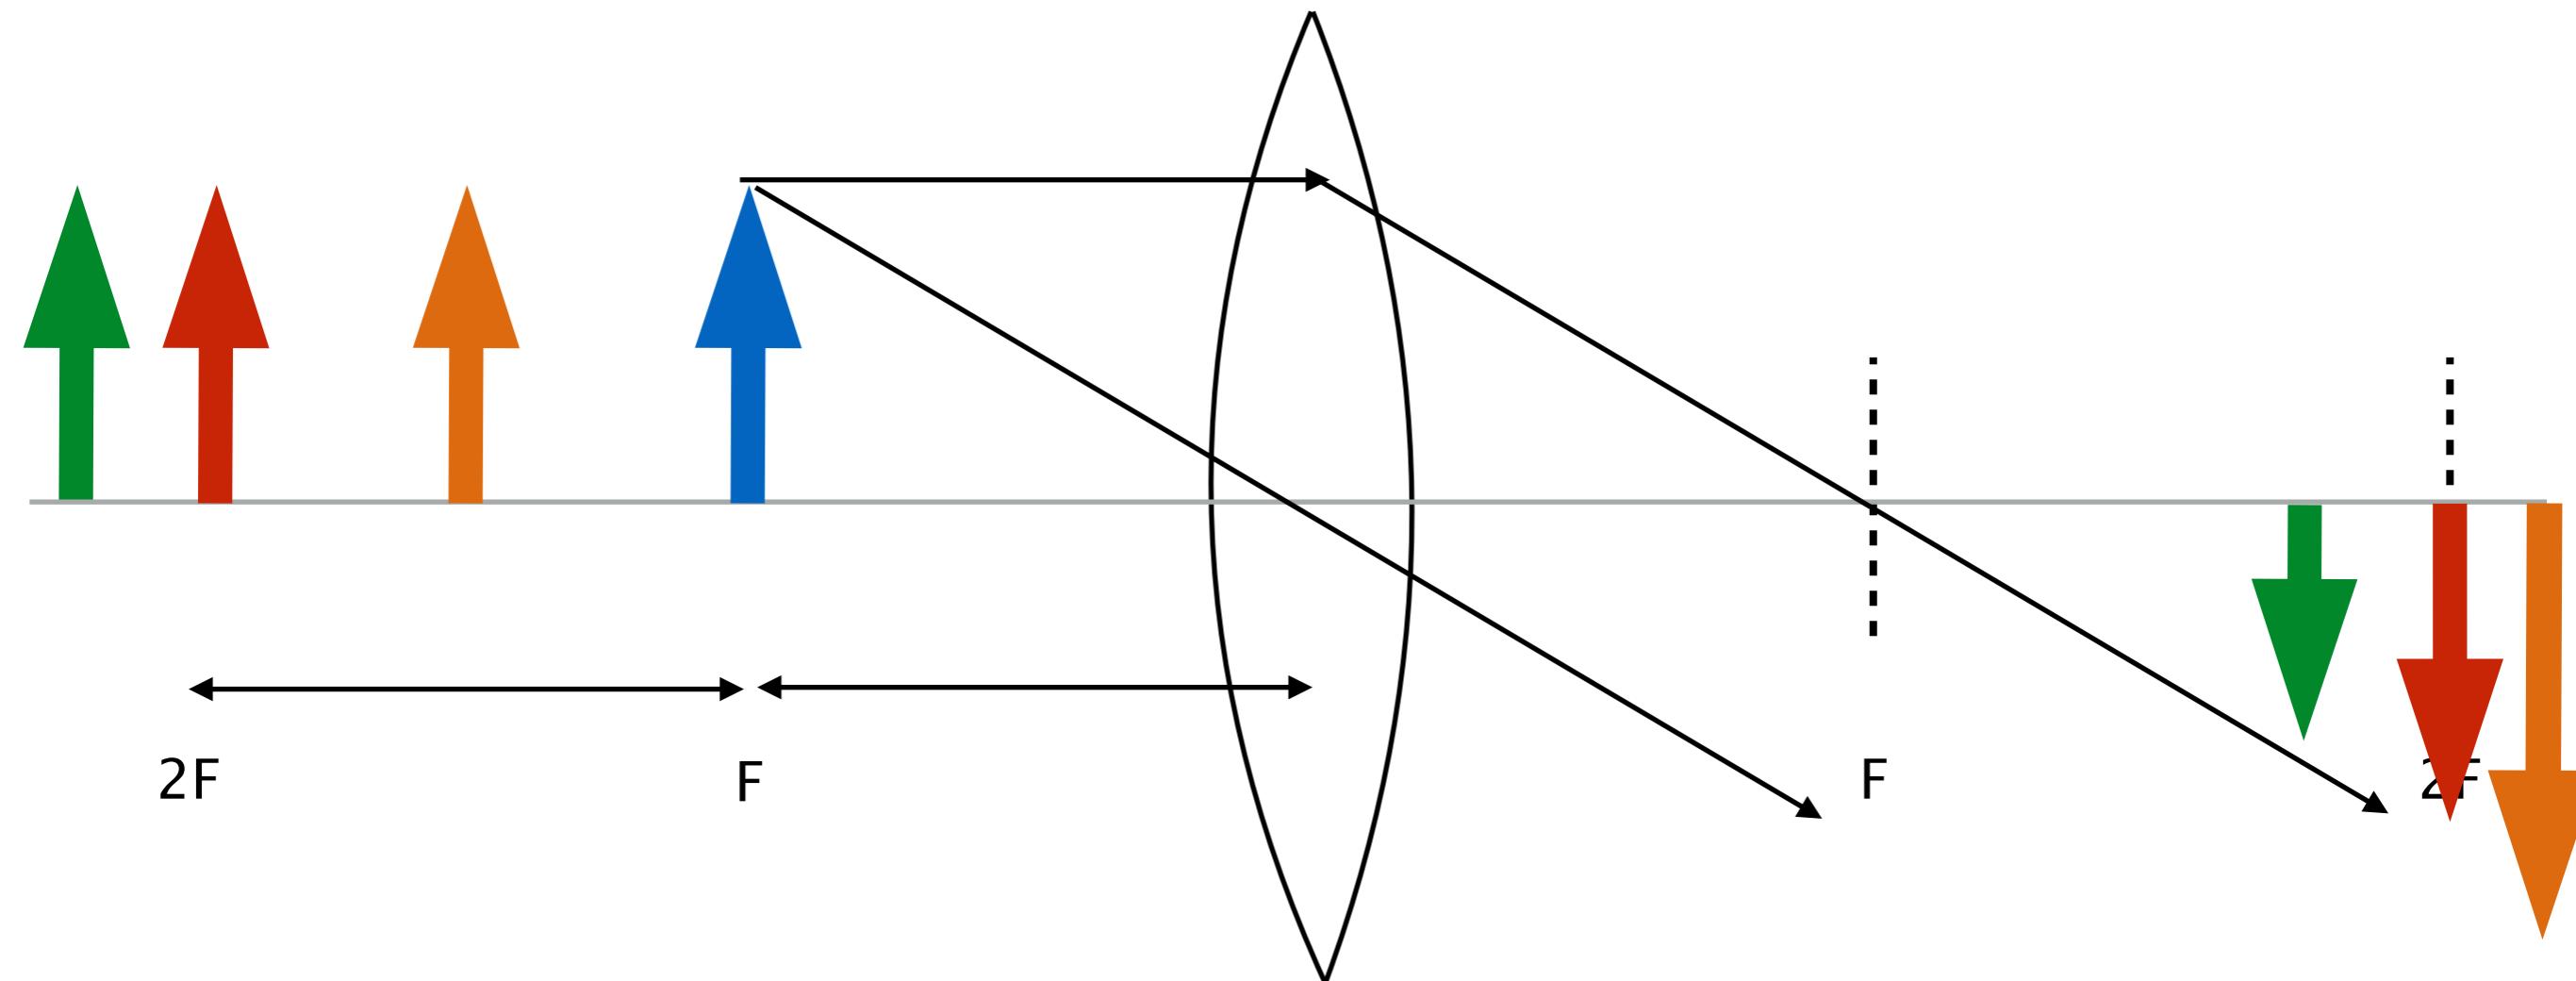

# Object / Image positions

# Object on focal point

# Lens formula

## Lens equation

f = focal length

p = distance to object

q = distance to image

$$\frac{1}{f} = \frac{1}{p} + \frac{1}{q}$$

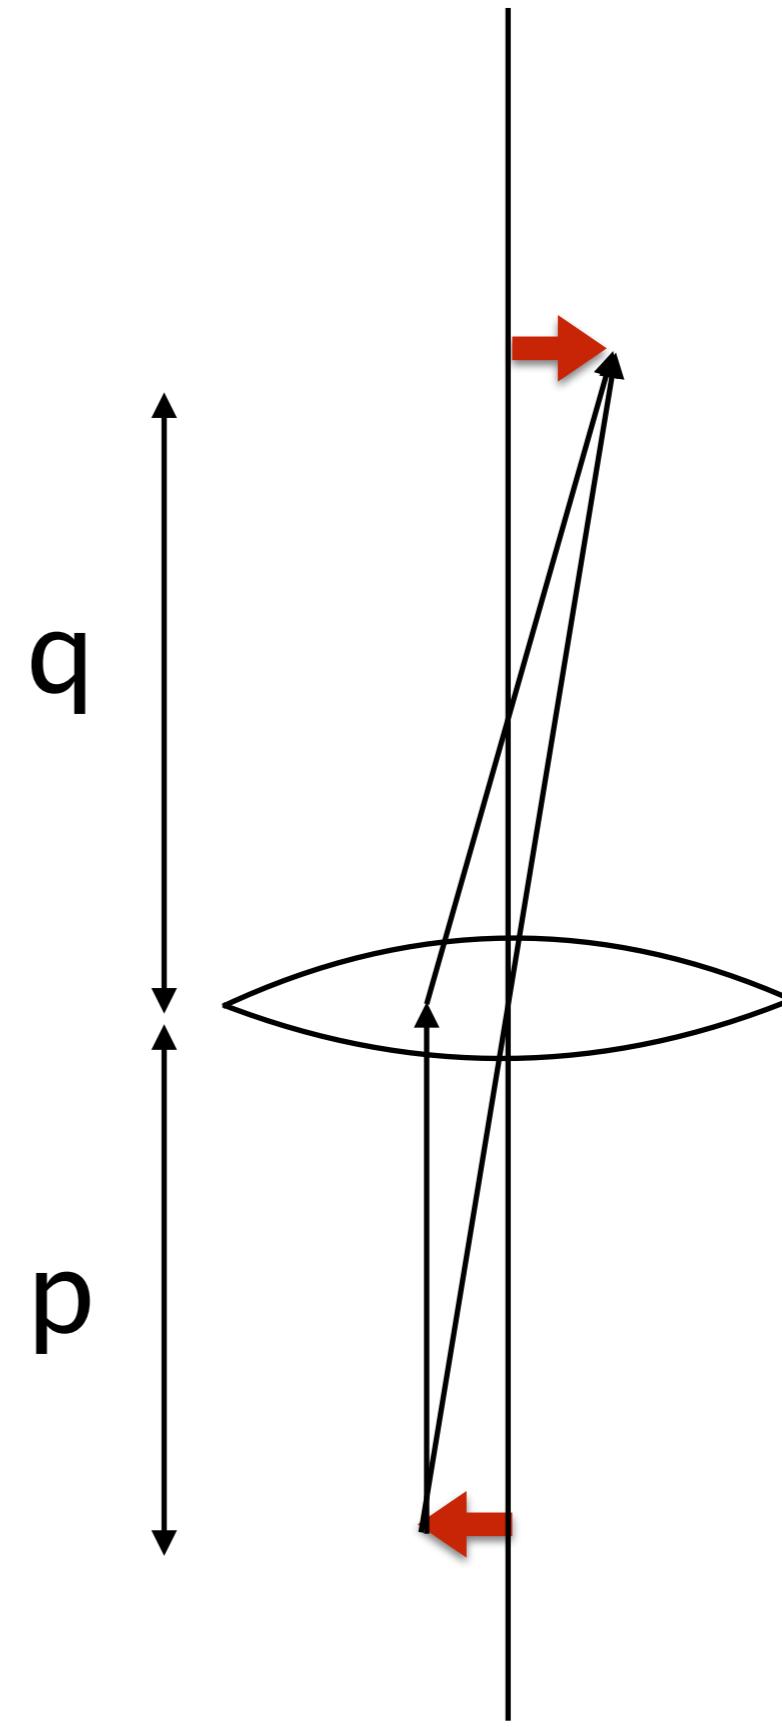

# Microscope formulas

$$f = 18.2$$

$$\frac{1}{f} = \frac{1}{p} + \frac{1}{q}$$

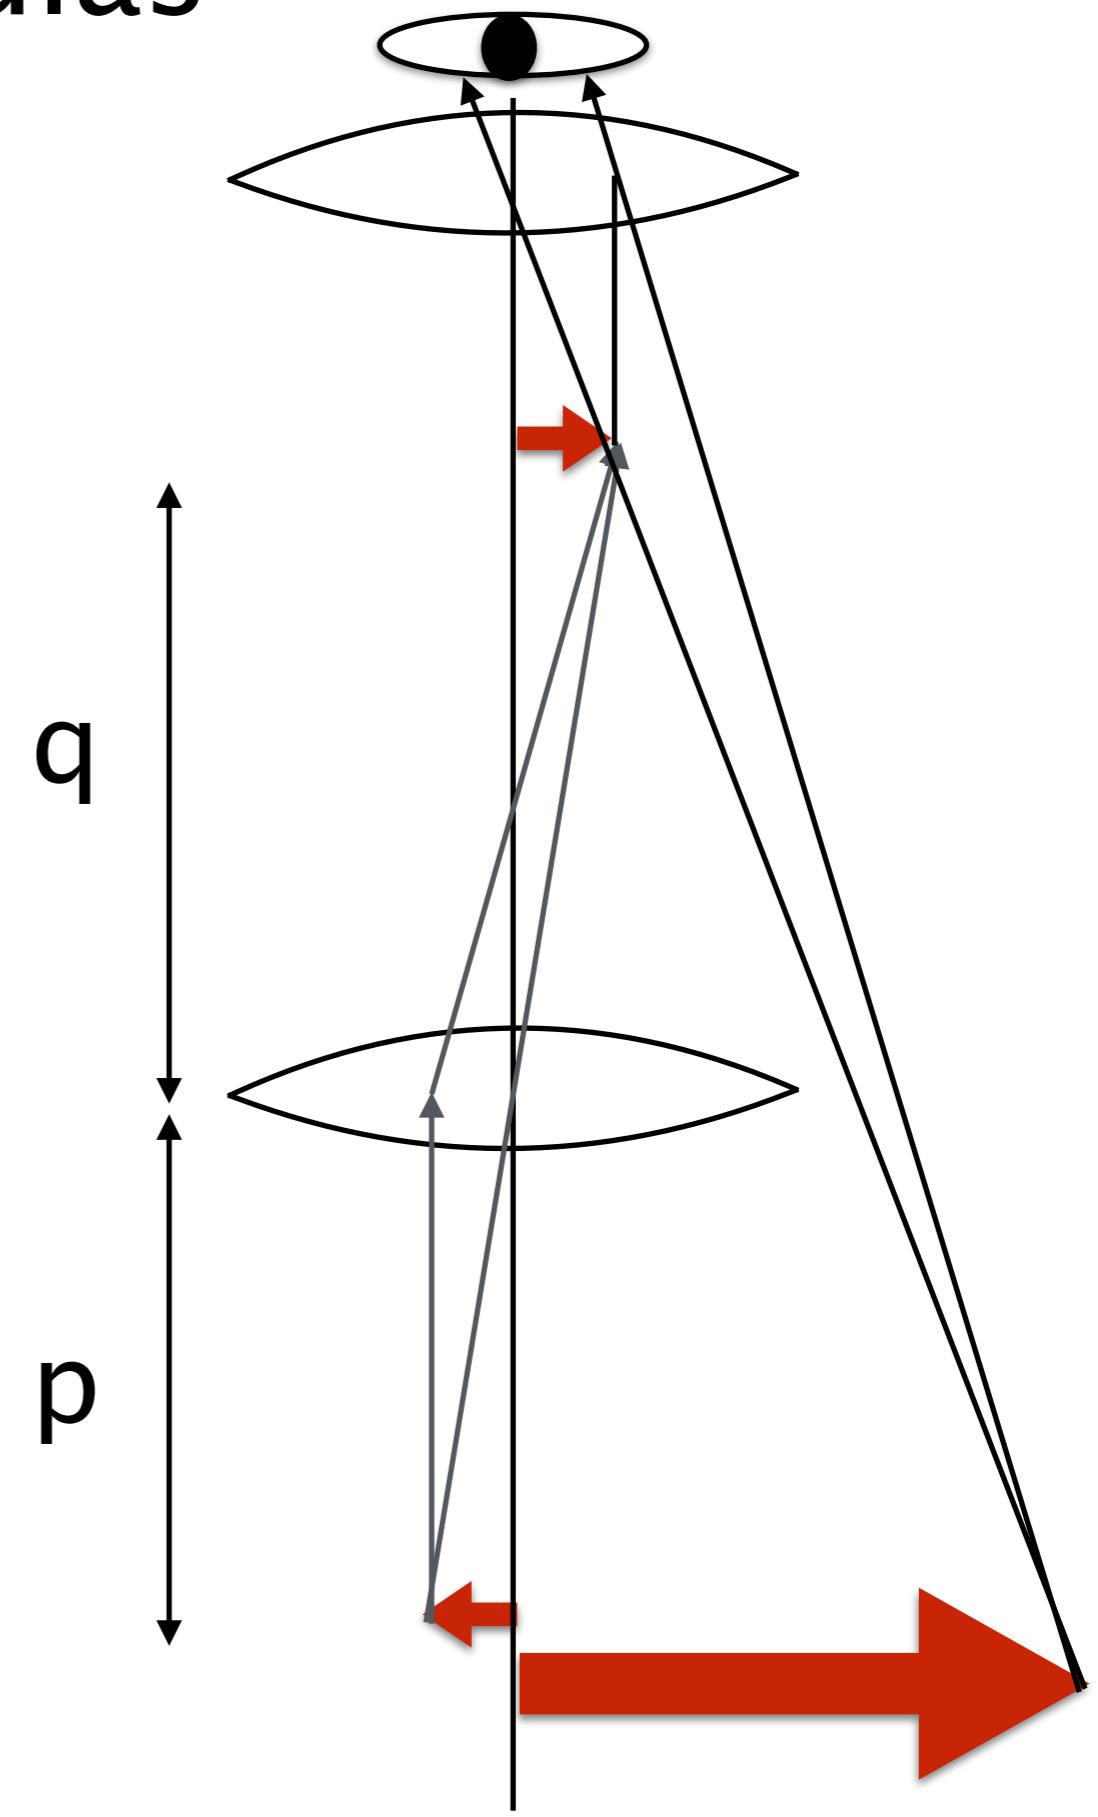

$$q = 160 \text{ mm}$$

$$p = 20.6 \text{ mm}$$

# Microscope formulas

This is a photograph of the alga Spirogyra. It is a rare sight here in southern California--even rarer if you do not have a microscope! But when I find see one, it always brings a smile to my face. The spirally arranged chloroplasts in a clear cellulose tube always inspire me. This is a focus stack of 30 sections, put together with Helicon focus.

Eudorina, CdF 40x

flys leg..4 images stacked with czp..
